HORTICULTURE

Fall Work in the Orchard

D. E. LOTHIAN, Peterboro Co., Ont.

Do we ever realize the full value of our small orchard? Many of us farmers who have considered the orchard as a mere sideline have been in the habit of cramming all our work on the trees into a day now and then in the springtime. This is not as it should be.

Of late we have heard much said about steady employment on the farm. The orchard offers this steady work if we will choose to go about it intelligently. There is work in the orchard in November, in September, or in May.

This month is the month in which I would clean away all rubbish. Broken limbs and all dead wood I would remove to the fire heap, as pests both in the form of insects and fungi are apt to infest such quarters.

BURN THE FIRE BLIGHT

Did you ever notice any of your trees in June and July to be suddenly seized with a scorched appearance. They look as if a fire had swept through the branches and burned the leaves quite black. This is not due to fire, but to a deadly disease to which the Apple, Pear and a few other summer varieties, I have noticed, are susceptible. Pear trees are even more liable to attack, and in a mixed orchard are generally the first to show the deadly symptoms.

This disease is known by the name of Fire Blight. If these affected branches were not removed and burned at the time they were noticed they should be immediately taken out and completely incinerated, now that the busy season is over.

The Bitter Rot, which has the appearance of round sunken spots on the twigs, leaves, and fruit, should also find a place on the fire heap. Many other fungus diseases affect the leaves and fruit of the apple tree, but these can be mostly prevented by spraying, which should be duly performed.

Now what about the innumerable twigs and leaves affected with the diseases already mentioned that lie strewn on the sod? Can we not do something to prevent those animals which visit of rot and apple scab? I believe this is one reason why we should cultivate our orchards, since old sod gives refuge to the diseases affected parts.

Reference to the standard authorities will show that cultivation of the orchard should be undertaken in the early spring, yet they say little, or nothing, about late fall plowing as trees are dormant.

It seems to me that orchards, particularly old ones, requiring renovation, could with profit be plowed after the trees are dormant.

FALL PLOWING
What are the advantages and disadvantages at issue? Some might say exposure, but can such a statement hold? We seldom, if ever, get frost sufficient to penetrate four or five inches before the safe onset of snow arrives. Last winter was exceptionally severe from the standpoint of exposure. Yet orchards which are run on a system of dry cropping seem to have fared quite fully. The advantages of late plowing are many. There is time to do it. The diseased leaves and twigs already referred to would be buried. The old sod with its tangled roots would be exposed to the frost. The texture of the soil would be improved, while moisture and air would be greatly increased.

POULTRY

Poultry

Early pullets and quarters and records. Damages to the poultry house avoid it. Have the front door away from the only light. A worry the rest. Don't let the hen with the hen. If there any now.

Cull the flock early all the weak legs, crows and all other. Breeders of White Wyandott, Plymouth Rock, too heavy feed to make the Poultry never unless it takes draught.

SEND THIS COUPON and \$1
This Coupon and one dollar if sent within two weeks from the date on this paper, entitles the sender to a \$3.50 Vacuum Washer without further charge.

SEND THIS COUPON and \$1.50
This Coupon and \$1.50, if sent within three weeks from the date on this paper, entitles the sender to a \$3.50 Vacuum Washer without further charge.

SEND THIS COUPON and \$2
This Coupon and \$2.00, if sent within one month from the date on this paper, entitles the sender to a \$3.50 Vacuum Washer without further charge.

This is the Fisher-Ford way.

If you are in time clip Coupon No. 1 and send it to us with one dollar, and we will send the day washer by mail, all charges paid. If you delay it will cost you more. Two weeks from the date on this paper the price of the Rapid Vacuum Washer will go up, and you will no longer be able to get one of these washers for a dollar, but will have to buy a dozen in order to get them at this price.

The Rapid has been so well advertised throughout Canada, and the States, and has given such perfect satisfaction, that it is unnecessary to again explain all the wonderful things it will do. We will just mention some of the exclusive features to be found in the Rapid. It is the only washer that has a valve, which is absolutely necessary to create a vacuum, and properly compress the air. It is the lightest and strongest made. A child of ten can operate it. It will wash a tub of clothes perfectly in three minutes. Sent to any used in any tub, boiler, or pail. It will wash the finest garments without wearing or tearing them. Sent to any address on receipt of price. If you are not satisfied we will return the full amount of your money.
