**PETER BROWN**  
Mgr. for A. S. ROGERS  
NEWMARKET - ONTARIO

Please mention "The Farmer's Advocate."

### Gossip.

**BARBER BROS'. 1914 CLYDESDALE IMPORTATION.**

Barber Bros., of Gatineau Point, Que., a short distance from Ottawa, have lately landed their 1914 importation of Clydesdale stallions. Barber Bros. have the true conception of the term "draft horse." They never import pony Clydesdales, and this lot will still enhance their reputation as importers of the very best kind of big draft horses. Draft character from the general contour of their bodies to the bottom of their feet is predominant in all of them, and this, coupled with their strong flat, flinty, good-wearing quality of bone, makes them one of the best importations of the ideal in draft horses landed in recent years. The few mentioned will give some idea of the great breeding they carry. Loudounhill Lad 15432 is a bay three-year-old, by the Cawdor Cup Champion, Revelanta; Solon 15426 is another bay three-year-old, by the Royal first-prize horse, Rycroft; Strathtay 15427 is a bay rising three, by the Invernie and Kilmarnock champion, Mendel. Another bay, rising three, is Gladiator 15425, by the renowned champion, Everlasting. These mentioned show the care exercised by the Messrs. Barber in the matter of breeding, and the pedigrees all through show the blood of Scotland's most famous sires, and this is the case with the entire lot, from yearlings up. All are for sale, and Barber Bros. are satisfied with a living profit.

### JAMES BENNING'S AYRSHIRES.

Without any blow or shouting from houstops, James Benning, of Williams-town, in Glengarry Co., a few miles from Lancaster Station, has in his large herd of Ayrshire cattle, many of the most profitable and heavy milk producers in this country. He works along with his cattle in his own quiet way, making a careful daily note of the yield of all his cows and heifers, and his system of culling out the unprofitables is as unyielding as adamant. He has been doing this for many years, and the splendid uniformity of show-ring form, and the big, well-balanced udders of the many cows and heifers, show the herd to have reached a high standard. A remarkable uniformity of truthness in their lines and ideality in type is conspicuously manifest in the daughters of the present stock bull, Imp. Lessnessock Comet, of which there are 22 due to freshen in the fall to a grandson of Imp. Cross of Knock-down, and out of a 45-lb.-a-day dam, with a butter-fat test of 4.02 per cent. The past summer the butter-fat test of the 22 in milk was 4.06 per cent., and a number of the mature cows giving up to 60 lbs. a day, and two-year-old heifers 41 lbs. a day. Anything in females, heifers, or mature cows, is for sale. Among the several young bulls, four of which are old enough for service, sired by the stock bull, is one out of Torrs Coney 2nd (imp.), whose record is 60 lbs. of 4.2 per cent. milk a day. Others are of the famous old big-producing Floss strain. Write your wants.

### Trade Topic.

The convention of Brandram-Henderson, Limited, makers of Brandram's B.-H. Genuine White Lead, and B.-H. "English" Paints, which are advertised in this paper, was held at Halifax at the end of 1912, and in the previous year it was held at Montreal. In order to give the Eastern and Western men a better chance to fraternize, however, the last one was held at Toronto. It opened on the morning of the 18th of December, at the Queen's Hotel, and two whole days were given to conferences and discussions on various subjects connected with the selling of paints and varnishes. Brandram-Henderson, Limited, are makers and distributors in Canada of the famous B.-H. Genuine White Lead. The Company's plant at Montreal in which this lead is corroded, is one of the finest of its kind in the world, and was built at a cost of \$300,000. It is with the product of this plant that Brandram-Henderson "English" Paints are made at the Company's paint factories in Montreal and Halifax. They have sales branches at St. John, Toronto, and Winnipeg, also a distributing depot at Edmonton.

## SHARPLES MILKER

Easy to Clean

Easy to Keep Clean

"They are easy to take care of," writes one SHARPLES MILKER user, whose name we will be glad to furnish on request. "When we get through milking we milk a pail of water through them, the machine is cleansed in water about scalding, then placed in a solution of lime water.

"The machines do not hurt the cows. We have used them eighteen months. To anyone in the dairy business I would recommend them. We are milking around seventy cows daily in an hour and ten minutes. We use five units.

"One man attends to the milkers and another man strips the cows. The cows like it better than hand milking and it does away with the labor problem. I had to keep eight and nine men on my farm, but after pay day we might have one or two to do the milking. It just made things hum for the foreman and one or two men that would be regularly on the job. Now we are

under no obligations to them. Everything works smoothly and there is no friction among the men picking out the easy milkers and all those stunts."

The SHARPLES MILKER now is being used in dairies of from 15 to 700 cows. Built sturdily, its operation is absolutely reliable.

Ask the editor of any national authoritative dairying paper what he thinks of the SHARPLES MILKER.

Catalog on request.
