## HOLLOWAY'S PILLS.

CURE OF ASTHMA.

Extract of a letter from Mr. Benjamin Mackie, a respectable Quaker, dated Cregagh, near Loughall, Ireland Sept. 14th, 1840.

Professor Holloway,

RESPECTED FRIEND.—Thy excellent Pills have effectually cured me of an Asthma, which afflicted me for three years to such an extent that I was obliged to walk my room at night for air, afraid of being suffocated if I went to bed by cough and phlegm. Besides taking thy Pills I rubbed plenty of thy Ointment into my chest night and morning. (Signed)

BENJAMIN MACKIE.

CURE OF TYPHUS FEVER, WHEN SUPPOSED TO BE AT THE POINT OF DEATH.

A respectable female in the neighbourhood of Loughall, was attacked with Typhus Fever. She lay for five days without having tasted any description of food. She was given over by the Surgeon, and preparations were made for her demise. Mr. Benjamin Mackie, the Quaker, whose case is referred to above, heard of the circumstance, and knowing the immense benefit that he himself had derived from Holloway's Pills, recommended an immediate trial, and eight were given to her, and the same number was continued night and morning for three days, and in a very short time she was completely cured.

To be had by wholesale in cases of 2 dozen each, or by retail, at moderate prices, at the Jermyn's Warehouse, June 18, 1840.

N. B. DANIEL STARR,

MOTT'S BROMA. The following observations having a reference to the preparation of Broma, appeared in a late number of the Boston Medical Journal:

"A few years since a great manufacturer of Broma sought the opinions of many medical gentlemen of distinction, for the purpose of having an unobjectionable food for invalids, and was assured that he had fully succeeded.

Hospitals, infirmaries, and households generally, should always be provided with it. When gruel, arrow-root, groats, barley, starch, rice, farina, and many other things ordinarily resorted to for patients are of no utility, the Broma is sometimes resorted to. It is believed that those who use it as a beverage will have manifest diastatic advantage over the consumers of tea and coffee. We see it stated that during the last summer those individuals who were continually using Chocolate or Broma neither had attacks of cholera or dysenteric affections, while others of the same families, taking their daily potions in tea, coffee, or simple cold water, were the sufferers, if any. We cannot vouch for the truth of this, but it has recurred to mind the statement that the oil dealers in London have been free from Cholera or the choleric symptoms. And it has been further observed that persons who were taking cod liver oil for chronic difficulties, during the prevalence of the late epidemic, were not infected by it. Vegetable oil in the first instance, and animal oil in the last, taken internally, would appear, by these statements, to have secured those who took them from the shafts of the pestilence. It is certainly a point well worth while to determine whether the chocolate drinkers have been secure in other infected cities."

Mott's Broma has now been before the public for a considerable period, and along with the commendations of the Medical Faculty of this and the neighbouring Provinces, it has received the approbation of all classes of consumers—it is held to be an article of standard reputation, and the demand for it is constantly increasing.

LIFE AND FIRE INSURANCE. The Undersigned

has been appointed Agent for the "TAXTON LIFE INSURANCE COMPANY OF TAXTON," United States, and having previously to taking the Agency, received satisfactory proof of the good standing and responsibility of the Institution, he has got into the public generally that he is not prepared to be its Policyholder, for obvious reasons, and to receive proposals for Life Policies, which will be forwarded to the Directors and Managers, Policies will be no liability returned. The Capital Stock in Trenton, Adriana, now \$20,000, was secured in good productive Stocks, Mortgages on Real Estate, and Cash in Banks—and is doing a very large and as yet from its commencement in 1841, a very successful business.

In the City Department they issued the first year, ending 1st Oct. 1840, Policies—a number which every few

Companies of long standing ever reached in the same time.

The benefit of the insurance in this Assurance is very apparent, and is not favourable to all Policyholders in this Society, inasmuch as they receive portion of each year's premium, being deducted from the Premiums then payable, which is lower than any of the English Companies and not subject to stamp duty—all the particulars of which are fully set forth in the pamphlet which the Agent and his distribution, who are in all Banks and every necessary information, together with the several Examining Certificate grants. All persons including themselves invited to call on the Agent, who will give them every information.

ROBERT S. BLACK, Esq., M. D. is Medical Examiner for the Company.

DANIEL STARR,

Halifax, Feb. 16. A. G.

STAR LIFE ASSURANCE SOCIETY, OF LONDON.

Capital Stock £100,000 Sterling. Chief Office, 21 Broadgate Street.

TRUSTEES.

James Hunter, Esq., Conquer Terrace, Islington.

Freaks, Studley, Esq., Banket, Nicasius Lane.

Thomas Stans, Esq., Liverpool.

Chairman of Directors, Charles Harwood, Esq., F. B. S.

Recorder of the City, John Josiah Battress, Esq.

Officer of the Board of Trade, R. S. Black, Esq., M. D.

Medical Examiner, R. S. Black, Esq., M. D.

The Agency of the above Company has been in operation in this Province about 4 years, has made considerable progress, without yet having a claim, and has a general popularity over from any other London or Scotch Company, and the proportion of profit divided among the insured greater, by far than any other, being 10 per cent. 10 per cent only to the stockholders, rendering it more than twice as much as any other Society without any risk to be assured; last year Business declared in Halifax were in some cases over three per cent, per annum on the amount of Policies, and on two Policies in this agency, on which three annual premiums only had been paid, the Board added was over 62 per cent on the amount paid in. Mortality among the lives assured by this Society were found to be in per cent less than had been calculated on the above facts in favour of the Star, when care is not to be overlooked, and should recommend it to the favourable consideration of all persons insuring themselves. Policies are paid on the principal premium, and allowed in certain payment of additional premiums. Thirty days allowed for the renewal of Policies after becoming due, and Policies expired can be renewed within six months, if the parties need not be injured and the payment of a small fee—a case of half the premium, which amounts to a certain sum, may be obtained for the last five years. No extra charge made for crossing to and from England in Steamers or first class sailing vessels at any season, by adding the Agent of the particular Insurance. Policies are sent out by next steamer after arrival of proposals. The attention of the Underwriters of this Province generally and of Wesleyans in particular, is requested to the favourable terms and privileges offered by the "Star" as above enumerated. It is admitted by all that it is the duty of every person having others dependent on him to provide for them; whether he have it in their power so to do, and in no way can this be done so effectually or cheaply as by paying according to their means a sum annually by a Life Policy. It has often been proved over here to be of much benefit to widows and orphans, and very unequal are both life and health, of whom we have had many sad proofs, that does not least mind us. Applicants will receive every information and attention to their requests by the Agent in Halifax, who furnishes all necessary Blanks, and Medical Examiner attends free of expenses to the applicants. All communications by mail must be prepaid.
