Buckets

# LINK-BELT

## Chains—Wheels—Buckets

for elevating and conveying materials of every character have earned a reputation for durability and efficient service.

**> FLINT-RIM <** wheels have hard, smooth bearing surfaces for contact with the chain links, thus insuring both wheels and chain from undue wear. They last twice as long as ordinary cast-iron wheels.

"C" Class Link-Belt is superior because of its joint construction which insures a long life of efficient service.

Link-Belt buckets are made by experienced molders who specialize on this work. They are remarkably free from blemishes and other casting deficiencies, have clean edges and sharp corners; gates are ground off and they are thoroughly oiled before shipment.
