SALES FOR THE WEEK AGGREGAT

thant and Morrison Were the Largest

The stock market during the pas

week has been in fairly good condition

which is evidenced by the fact that 164

000 shares were disposed of on the ex-

change. While there is no great change

in prices shares are fairly steady and there

is demand every day. Brokers, while

they would like more business, report that

they are making some money. Later on

in the year, unless something occurs in

the nature of a setback of considerable

magnitude, there will be, it is thought, a

more lively market. The mining industry

is growing and expanding as never before and it is obvious that from the increasing

output a number are making a profit and

this tends to increase the number of those who invest in shares, and to give increas-

ed confidence to those who hold them. The sales for the week ending yester-day by days were as follows:

Monday ..... 11.500

Tuesday ..... 23,000

Against 189,500 shares for the previous

Giant moved to the extent of 39 000

shares during the week. It opened at 3 3-4 and closed at 3 1-8 cents. There is

no change in the situation of the Giant, the property remains closed and will be

completed their payments, or have wn up the option. It is claimed, how-

lars.

On April 3rd, 1899, almost two year

ago, the Topic paid its first visit to the Nettie L. mine. At that time the truit of Manager Pool's scheme of development

was just becoming apparent. Ore in quantity had been struck and preparations for

the first shipment were being mad Looking over the files of the Topic w

find that at the neriod named above the

amount of actual development was a lit-tle over 200 feet. On Tuesday last the

aggregate distance driven, sunk and raised amounted to 2,000 feet, a progress of about 2 1-2 feet per day since our last

visit. Two years ago the value of the Nettie L, with the ore then in sight was

in dispute among the local authorities. Today with a shipment of 455 tons of ore

at the Landing and the returns from 145 sent to the smelter to hand, there is but one opinion and that is that there is the making of a mine in the Nettle L. To say that this property is an easily worked proposition is idle, for with a vein 200 feet wide in which to pick out

tude for error which would be quite ex

cusable even in a mining man of lifelong

experience. However, providence has been very kind to the management of the

Nettie L. for they have handled this

enormous proposition with remarkable

Victoria, B.C., March 29 .- A bill to inshed rapidly corporate the Crow's Nest Southern railway, which it was expected would meet with strong opposition in the legislature passed the second reading this alternoon without opposition. This is the railway which is to be built from the Crow's Nest Pass coal mines to connect with the Gneat Northern system.

COAST-KOOTENAY RAILWAY

Full Text of the Conditions Imposed by the Government.

Victoria, B.C., March 29 .- The full text of the conditions which the provincia government proposes to impose on the mpany undertaking to construct the Coast-Kootenay road have been publish ed. They are as follows:

That the subsidy shall not be payable party until he sees it well started up the nntil the railway is completed and in running order to the satisfaction of the lieutenant governor-in-council, and securtime about ity to the like satisfaction has been given for the continuous maintenance and operation of the railway;

That 4 per cent. per annum of the gross earnings of the railway shall be paid to Reasons Given for Adjournment of the the province, and such sum of 4 per cent. shall be a first charge upon the earn ings;

That the railway obtaining the benefit be adjourned for two weeks from Wed- of any such subsidy shall be constructed mesday. The object is to allow the mem- wholly and as a continuous line in the

bers to consult their constituents on the province. That the lieutenant-governor-in-council railway question, the government having shall have absolute control of freight and supporters on this question. The budget passenger rates to be charged by the rail-

That in the event of a charter being granted by the Dominion government for a line of railway over or parallel to the to take the position of agent general of route proposed by the act, the foregoing and carried out by the company so in opened in May, and it is expected corporated as a contract and obligation of the said company, prior to any other that R. E. Gosnell, secretary to the pre mier, will go over. It will cost the province charge thereon; That a suitable steam ferry for the \$10,000 a year. A movement is on foot

transportation of cars for freight and passengers shall be operated daily between the mainland and Vancouver island, at the most convenient points, and that a proper railway connection shall be made with the cities of Vancouver and New

Westminster; That the plans, specifications and conditions of any proposed contract for the construction of the railway shall be sub-

ject to the approval of the lieutenant governor-in-council, and that the contracts shall be submitted to public tender and competition, under such conditions as the lieutenant governor in - council shall approve, and no contract shall be awarded or work or material thereunder accepted

without the like approval; That no Chinese or Japanese shall be employed during the construction of the railway;

That no aliens shall be employed the railway during construction unless it is demonstrated to the satisfaction of the lieutienant-governor-in-council that work cannot be proceeded with without by the Executive committee of the club the employment of aliens.
