An Always Ready Pill.—To those of regular habit medicine is of little concern, but the great majority of men are not of regular habit. The worry and cares of business prevent it, and out of the irregularity of life comes dyspepsia, indigestion, liver and kidney troubles as a protest. The rundown system demands a corrective and there is none better than Parmelee's Vegetable Pills. They are simple in their composition and can be taken by the most delicately constituted. A Tribute From Harper's.

A traveler, returned from a journey to Seattle, which so many easterners have made to their profit, reports an interesting observation. He came back by way of British Columbia, and the Canadian Pacific Railroad. He reports being impressed with the different appearance of things north and south of the Canadian boundary, in that on the Canada side things were so much more shipshape. The houses to his eyes looked neater and

better, the yards were neater, there were everywhere signs of greater ef-fort among the Canadian settlers to secure comeliness in their surround-ings; of more solicitude about the conditions of living and more ambi-tion to maintain civilized standards. We cannot verify these observa-tions, but give them for what they are worth. Doubtless the far-western Canadian colonists are largely British and have carried with them dooryard and cottage traditions from the comely, cultivated islands which vagrant Americans love to visit and admire. An Englishman will have flowers in his dooryard if he can, and is apt to know how to have them, and to take the trouble to make them grow. That is one good fruit of training and long-standing civilization. It is by no means so common as yet in the Unit-ed States as in England. The English-man pays more attention to living and does not skip the details. The
