**Muskrat Open Seas-
son Ended May 1**

The general public would do well to
remember that by legislation passed
at the last session of the House of As-
sembly the open season for the kill-
ing of muskrats was curtailed and un-
der existing laws ends May 1st instead
of May 15th as heretofore. This means
that the close season went into effect
on Saturday last and anyone taking
the animals after that date is liable
to prosecution. The penalty varies
from \$4 to \$10.

An important amendment to the
game laws of which all should be
aware is that each killing of an animal
is now regarded as a separate
offense. Formerly but one offense a
day could be charged. Under that re-
gulation the Chief Game Warden
about a year ago could bring but one
charge against a man who had killed
seventy-nine muskrats.

The prices of fur which were re-
markably high a short time ago, have
dropped to a marked extent. Muskrats
pelts within the past few days were
sold here as low as 2.50 each. Beaver
and other fur has dropped to a
similar degree. Many owners of furs
are refusing to sell them at current
quotations preferring to store them
for a possible revival in the market.
Buyers claim that the world is well
stocked with furs and that it is
doubtful if there will be any great re-
vival in prices.

**A
Terrible
Penalty**

frequently follows the neglect of
an injury. Germs and dust get into
the wound, it begins to fester, blood-
poisoning sets in, and sometimes
the loss of a limb is the result.
Safeguard yourself against such
a possibility by applying Zam-Buk
at once. This antiseptic balm de-
stroys all germs and prevents festering
and blood-poisoning. Then the
healing essences promote the
growth of new tissue and it is not
long before the wound is com-
pletely healed.
Zam-Buk should be kept handy
in every home, office, store and factory
for cuts, scratches, burns,
scalds and bruises. It is equally
good for eczema, rashes, boils and
ulcers. All dealers, 50c. box.

**Applied
After Shaving**

Keeps the Skin Soft and
Smooth

MANY men suffer from
irritation of the skin
as a result of shaving. With
some it assumes a form of
eczema and becomes most
annoying and unsightly.

By applying a little of Dr.
Chase's Ointment after shav-
ing the irritation is overcome
and such ailments as Barber's
Itch and Eczema are cured.

60 cents a box, all dealers, or Edmanson,
Bates & Co., Ltd., Toronto.

**Dr. Chase's
Ointment**

A Dyspepsia Cure

M. D. advises: "Persons who
suffer from severe indigestion
and constipation can cure them-
selves by taking fifteen to
thirty drops of Extract of Roots
after each meal and at bedtime.
This remedy is known as Mother
Seigel's Curative Syrup in the drug
trade." Get the genuine. 50c.
and \$1.00 Bottles.

**A
New Man**

If you are suffering from
dyspepsia or other sto-
mach trouble, you will
appreciate a medicine
that will relieve and
correct your condition.

**HAWKERS'
DYSPEPSIA
REMEDY**

regulates and invigorates
the digestive organs, pre-
vents acid fermentation
and souring in the stomach,
and promotes digestion and
assimilation of the food.
Try this extraordinary me-
dicine—it will make you
feel like a new man.
Sold at all drug and general stores, 50c.
The Canadian Drug Co., Limited
St. John, N.B.

**Quack, Couch or
Twitch Grass**

This weed is a perennial, propagat-
ed by seeds and sweeping root-stalks,
persistent in all deep ploughed lands
and in all crops, having great power
in spreading and choking out other
plants.

The permanent means of breaking
this weed under control is to adopt
for the area infested a sort rotation
of rotation of crops or cropping plan
which includes a hoed crop, once in
three or four years. A short rota-
tion of three years duration is pre-
ferable since there is a hoed crop
and only one crop of hay in a three
year period conditions which tend to
give the pest the least chance of
flourishing. Another suitable rota-
tion is one of four years duration of
one year each in hoed, grain, clover
and timothy hay crop. For timothy
hay or pasture areas the procedure
is as follows.

Allow the plant to exhaust its sub-
stance in the production of a hay
crop, which should be cut and re-
moved as soon as the head is formed
and before it is in bloom. Plough
shallow, roll, disc once or twice to
break up the sod and then cultivate
with a stiff-tooth cultivator until the
root-stalks have been pulled to the sur-
face of a soil. When the accumula-
tion of roots is so great as to inter-
fere with the efficient working of the
cultivator remove or burn them and
continue cultivating in order to com-
plete the work. In the autumn, ridge
or deep roots to the action of frost
than ordinary ploughing. Frost is an
agent in the control of quack grass
that should be made use of every
possible occasion.

Grain areas that contain quack
are not in fit condition to be seeded
down to grasses and clovers nor are
they in shape for the growing of pro-
fitable crops in the future until after
control measures have been intro-
duced. Immediately after harvest
stubble land should be shallow
ploughed, disced once or twice to
break down and consolidate the fur-
row slices after which the stiff-tooth
cultivator can be employed to advan-
tage to obtain the necessary depth
to facilitate the drawing of the root
stalks or underground stems of quack
to the surface. Cultivation should
be thorough and the fall treatment
as outlined for meadow or pasture
land will apply on stubble.

THE STIFF TOOTH CULTIVATOR
IS AN ESSENTIAL IMPLEMENT
IN ANY CULTURAL PLAN FOR
THE CONTROL OF QUACK GRASS.
THE DISC HARROW USED AS
THE COMBATANT IMPLEMENT
ACTS AS A FORCE AGAINST THE
SUCCESS OF OTHERWISE THOR-
OUGH TREATMENT. THE USE OF
THE DISC HARROW IN THIS CON-
NECTION SHOULD BE LIMITED TO
WORK OF DISINTEGRATING AND
PULVERIZING SOD AND SURFACE
RATHER THAN BREAK EACH
ROOT INTO SEVERAL PARTS.
EACH SMALL PIECE, LIKE THE
POTATO SET IS CAPABLE OF EST-
ABLISHING A NEW PLANT.

The following spring the area
treated as described, should be planted
to hoed crop for which manure may
be applied, before the last ploughing
or ridging in the fall or during the
winter or spring. This brings us to
the first year of the rotation from
which period the procedure in crop-
ping would be as outlined in the rota-
tions recommended.

Where no regular hoed crop is
grown, which is poor farm practice,
rape or buckwheat sown on an infest-
ed area after it has been thoroughly
cultivated and the root-stalks removed,
prove excellent smothering crops.
For late sowing and as "first aid" in
the control of the weed on an excep-
tionally dirty field where other crops
would be choked out and before at-
tempting a hoed crop the two mentioned
crops are very useful. Smothering
crops, however, are recommended only
as a temporary means of control.
It is only by thorough persistent cul-
tural methods and the proper utiliza-
tion of crops that any satisfactory
degree of success will be attained.

**"Produce More
And Waste Less"**

New York, May 4—"Increase produc-
tion and waste less," is the advice
tendered by Lord Shaughnessy in a
review of the present day outlook
published today in the Wall Street
Journal.

"It should be our prayer," says Lord
Shaughnessy, "that contraction be not
swift and that price correction be or-
derly and spread over a long period.
History will repeat itself, as it did
after the American Revolution, after
the civil wars and after the great
wars of olden times. There can be no
real liquidation of wages until com-
modity prices are lowered. It was
true a year ago and remains true now
We must increase production and de-
crease wasteful consumption.

The United States through its re-
serve system, and Canada through its
branch banks can hasten this process
through judicious conservation of
new credit. But a concerted
program of contraction in either coun-
try would still be a congestive stric-
ture. We have no such program or
formula here. It is the task of the
farmer, merchant and manufacturer,
and finally of the consumer to co-
operate with the bank to produce natu-
ral deflation."

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children.
Foods are specially prepared for babies. A baby's medicine
is even more essential for Baby. Remedies primarily prepared
for grown-ups are not interchangeable. It was the need of a
remedy for the common ailments of Infants and Children
that brought Castoria before the public after years of research,
and no claim has been made for it that its use for over 30
years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric,
Drops and Soothing Syrups. It is pleasant. It contains
neither Opium, Morphine nor other narcotic substance. Its
age is its guarantee. For more than thirty years it has
been in constant use for the relief of Constipation, Flatulency,
Wind Colic and Diarrhoea; allaying Feverishness arising
therefrom, and by regulating the Stomach and Bowels, aids
the assimilation of Food; giving healthy and natural sleep.
