HENRY BLAIR

St. John's

From Labrador.

The S.S. Seal arrived in port last night from Labrador ports. She brought a small freight and several passengers. She was as far north as Hopedale and brought along a full complement of passengers who were landed at different places in Trinity and Conception Bays. The Seal reports foggy weather the whole trip. All the "stationers" who can be now leaving the coast and most of the "floaters" have passed south or are coming up the coast. There is still a good sign of fish from Hopedale up and when the weather is favorable good catches are taken by hook and liners. A number of Nova Scotia bankers which have been fishing on the coast since early in September and were well supplied with bait have done remarkably well. A few of them have left for their home ports with from 800 to 1000 qts., according to reports.
