THE COSSACKS FAIL TO SHINE

COWBOYS OF THE CZAR'S ARMY DO NOT SUSTAIN THEIR OLDTIME REPUTATION.

The Japanese Cavalry Appear to Hold Their Own In Manchuria-Learned Nothing From Boer War.

Although the Czar of all the Russias may proclaim his newborn son com-mander-in-chief of all the Cossacks, signifying to his gallant soldiery that the little father" has not lost confidence in his chosen troops, the world expert military critic and mere layman alike, has lost faith in the prowess of these hordes of irregular cavalry, from which so much has been expected and so little realized in the present eastern

With the memory of the Boer war fresh in the minds of military men, with the exploits of the irregular mounted farmers of the Transvaal but newly added to military records, the general expectation was that the Cossacks, famed since the days of wild Mazeppa as terrible and relnetness foes, resembling those that fought under Botha and Cronje, would add to their luster. Of all fields of battle it was particularly appropriate that Asia should be their chosen fighting ground, for, following Skobeloff and all the famous Russian leaders, the Cossack cavalry has carried the Russian empire from the Ural to the Pacific, as the ancient pioneers of America bore a more peaceful rule from the Alleghanies

to the Pacific. Military critics who study the history of the Cossack find, however, that his exploits belong rather in the volumes devoted to border warfare against uncivilized foes than to the records of cavalry in civilized war, established by generals-like Murat, Sheridan and Forrest. From the beginning the Cossacks have seldom distinguished themselves against such foes as the Japanese have

proved themselves.
As early as Poltava, the fatal battle which ended the conquests of Charles XH, of Sweden and made Peter the Great master of the land of the Don Cossacks, their battles in open field have been generally unsuccessful. Not even the famous Mazeppa could lead his Cossacks to victory here, and their independence was the price exacted by the Emperor.

Not until Napoleon started on the dreadful retreat from Moscow, when his splendid army was reduced to a wreck, did the Cossacks distinguish themselves, and here their tactics shone in fearful brilliance. The charge of the light brigade at Balaklava, however, found no parallel in Cossack bravery or success in the Crimea, and even for the Turk, when Osman Pasha held But in Asia, where Skobeloff captured kingdom after kingdom, penetrating Turkestan and crushing the Turcoman eavalry, the Cossack won great renown.

WHERE HE IS INVINCIBLE. Operating against a foe less well armed and equipped, if equal in gallantry, guided by well-trained leaders, the Cossacks proved invincible. Indeed. here their tactics were so successful that the American army in its fights against the Indians adopted many of them, and the Cossack outpost still persists in the Philippines, where an uncivilized foe is met.

But against General Kuroki the Cossack has signally failed. Military critics assert that this is due in part to the vast line of communications General Kuropatkin has to protect to the immense transport-guarding necessary and also to the huge Russian army, mmobile and entirely unlike that of the Boers, for which the Cossacks must continually act as a covering force in the endless retreats. Be that as it may, however, his gallantry may have per-ished, but the little Japanese cavalryman, mounted on his diminutive pony, has not been overwhelmed and destroyed, as the world believed he would by his huge Cossack foe, who claimed kinship long ago to the rough riders of the Spanish-American war. Russian in a measure by race, although having a strain of the blood of the great Tartars who once overran Europe and of the blood of the Polish

Europe and of the blood of the Polish race, the Cossacks are more of a fighting race, this carrying the famous largestive of the North American Indian han a civilized community.
