## Y. W. C. A. HAS NO OPTION ON LOCAL **BUILDING FOR HOME**

General Secretary Indignant At False Reports Circulated.

Mrs. Henderson, general secretary of the Y. W. C. A., declares that there is no truth in the story circulated by a local paper that the Y. W. C. A. has an option on property which it intends to convert into a new recreational and administrative building. For some months past the Y. W. C. A. board has felt the great need of a new building better adapted to its purposes, but abandoned the idea of such a building for the present, when the last campaign for funds was launched. This campaign was advertised as one to raise funds for "carrying on" purposes only.

only.

It would be impossible for the Y. W. C. A. board to option a building, when there are no funds available for its purchase. It is true that a better-equipped and larger Y. W. C. A. building is necessary in London, and that without doubt the Y. W. C. A. will come to the city for funds in the near future to make such a building possible, but that there is to make such a building possible, but the steron no steers toward the purchase. it has taken no steps toward the pur-chase of such a building as yet. The Y. W. C. A. general secretary was indignant that untrue stories about the board's actions should be circu-

Not Eating Much.

Fat folks who are frankly and avowedly fat are crabbed by nature, contrary to a popular belief. It is the folks who are getting fat, not yet avowedly fat, who are good natured. These folks are too good natured about it for their own welfare. They actually welcome the excess weight, in many instances, as a sign of health, whereas it is a sign of impaired physical efficiency and an onen of shortened life.

It is a most amazing thing, how complemently a human being takes a steadily increasing obesity. It a man has a woman does not become too fat unless the horse a certain amount of feed everyday and a certain amount of feed everyday and a certain amount of exercise, to keep the animal in condition. When a man feeds a horse too much or fails to give the horse a sufficient amount of daily work or exercise to burn up the nutriment assimilated, people feel sorry for the man, for he isn't bright. The horse soon peters out if so unintelligents the man can keep a wife, and feed her all sorts of fast. Well, learning the content of fat. An early reply would greatly oblige. This is my first visit to your Mailbox. I have enjoyed reading your page for some time. I saw in the paper a few days ago where "Honey B" asked for an old reading about a Bag of Beans to be given at a bean supper. Although I cannot supply this, am work fine in a home that's well heated and ventilated, but where the temperature falls low when the fires go down, it's well for an infant or small child to be cuddled in the warm blanket of an elder, and taken care of, and there would not be so many sick children. I have heard of poor, wee kiddles in cold country homes having their feet frozen by being exposed after throwing off the cover in the first part of the night, and then when the rooms got chilled there was no one to cover the child.

A small hand brush (the two for 5 ferents) is solendld for cleaning note.

Also tainted meaks a very nice sandwich.

A small hand brush (the two for 5 cents) is splendid for cleaning potatoes that are to be baked, and if in a hurry parboil for a few moments before putting in oven. For potatoes that are to be put in with roast meat select those not too large, peel and boil about fifteen minutes, and finish with meat.

May I have the stocking foot pattern? Will send small offering, and hope I may help someone at some time. Best wishes to you, Miss Grey, also friends of the Mail-Box.
