Life and Character Reading.

MAY 9.

People born on this date should be alone as much as possible, for they are natural psychic collectors of thought adapted for present material. They also must learn to make all important decisions when they are entirely alone, because they are influenced by those about them. They must be kept free from anger and jealousy.

As a rule most children born under this date are wiful and determined to have their own way at all hazards. They have great power of endurance, and are natural conquerors. They are quick to follow the example of their elders, so that the parents must be very cautious in their presence.

The governing planet of this date is Venus, Goddess of Love, whose loving influence helps to offset the more harmful influence of Taurus, the governing sign. The birthstone is a moss-agate.
