## Afraid to Eat?

Does the fear of indigestion spoil the enjoyment of your meals? It needn't. Just take

**NA-DRU-CO DYSPEPSIA TABLETS**

and you won't know you have a stomach. They will see to it that your food is properly digested. They are among the best of the NA-DRU-CO preparations, compounded by expert chemists and guaranteed by the largest wholesale druggists in Canada. 50c. a box. If your druggist has not stocked them yet, send us 50c. and we will mail you a box.

NATIONAL DRUG AND CHEMICAL CO. OF CANADA LIMITED, MONTREAL.

## The Campbellton Graphic

H. B. ANSLOW, EDITOR AND MANAGER.

CAMPBELLTON, N. B., NOVEMBER 25th, 1910.

A correspondent of the St. John Telegraph hits off the condition of the Hazen boulevards excellently. He says there is on them too much water for an automobile and too little for a motor boat and so the farmers have to stay at home having neither.

There has been a remarkably sudden drop in the prices of meat food in New York city during the past fortnight. Fresh pork dropped 5c. per pound and ham 4c. per pound. Compared with two months ago, beef steak has dropped from 2 to 3c. per pound; chickens 5c. per pound; 3 1/2c. per pound. Traders say it is due to the bumper crops, but the people maintain it is due to the result of the recent bye and general elections.

If you are a kicker and see the shadows of failure in everything that is proposed to help the town, for heaven's sake go into some secluded canyon and kick your own shadow on the clay bank, and give the men who are working to build up the town a chance. One long-faced, hollow eyed, whining, gaping, chronic kicker can do more to from a town than all the drouths, short crops, cinch bugs, cyclones and blizzards combined.—Millet Packet.

## Standard Topographical Map of Canada

The Department of the Interior has just issued a new map of Prince Edward Island comprising sheet No. 14 of the Standard Topographical Map of Canada. This map covers not only the whole of the Island but parts of the counties of Kent and West-

morland in New Brunswick and parts of the counties of Cumberland, Colchester, Pictou, Antigonish and Inverness in Nova Scotia.

The map is of a convenient size—about 3 feet square and is on the comparatively large scale of 3.95 miles to the inch. It shows all surveys to date, post offices, stations on the railway, highways and roads and all other available information within the territory covered.

A series of these maps is being issued by the Chief Geographer of the Department of the Interior. Maps are being prepared in detail of the most important districts of the Dominion and the intention is to combine them as has been now done in the case of Prince Edward Island into large and complete maps of each of the provinces of Canada when all are finished. In the meantime, copies of the map of each district are being issued for the convenience of the public as soon as the individual plates are completed. The following sheets have been published covering portions of Nova Scotia on the same scale as the map of Prince Edward Island: The Cape Breton sheet—(comprising Cape Breton and part of Guysborough). The Truro sheet comprising Pictou and parts of the counties of Antigonish, Guysborough, Halifax, Colchester, Cumberland and Hants.

The Halifax, Yarmouth and Moncton sheets covering the remainder of the province and part of New Brunswick are in progress. In New Brunswick, the St. John sheet on the smaller scale of 7.95 miles to the inch was published in 1905; the south eastern part of the counties of Kent, Westmorland and Albert not being shown but a new and up-to-date map covering the entire province is under preparation.

It will be interesting to the public to know that single copies of

any one of the published sheets of the Standard Topographical Map may be obtained free on application to the Chief Geographer of the Department of the Interior, Ottawa.

## CANADIAN MAGAZINE

FOR NOVEMBER.

The significance of the co-operative movement among farmers in Western Canada is strikingly shown in an article by George Fisher Chipman in the November Canadian Magazine, entitled "The Voice From the Soil." According to Mr. Chipman, Western farmers are now in a position practically dictate to the Government. Another noteworthy contribution to this number is a chapter, entitled "My Early Connection with London Journalism," which is taken from the Reminiscences of Goldwin Smith soon to be published. Mr. Newton MacTavish gives a sprightly account of the visit of 169 school-teachers of Manitoba to Great Britain, and James Cooke Mills has a fine article on the new tunnel under the Detroit river. "The Golden Nickel Plate" is another article by Harold Sands on the romantic aspects of British Columbia mining. These articles are well illustrated. "The Settlement in South Africa," by Hon. Lionel Curtis, is a splendid article summing up the situation in the new British Dominion.

There are also short stories by Clare Giffin, Fred M. White, and Tessie M. Scott, with poems by Isabel Ecclestone Mackay, May Austin Low, Theodore Roberts, and Margaret O'Grady.

## NO HOSPITAL FOR MR. LAWLER

HE TOOK GIN PILLS

If you ever hear anyone say that Rheumatism can't be cured, ask them if they have ever tried GIN PILLS. Or put them to write us for proof that GIN PILLS have cured hundreds and hundreds of cases of Rheumatism, Sciatica, Lumbago, Pain in the Back and other troubles caused by weak kidneys or bladder.

Rheumatism can be cured—is being cured every day—by GIN PILLS. Here is the best kind of proof.

"I have been troubled with Rheumatism so bad that I could not work. A doctor tended me and told me to go to the hospital but all to no good until a friend told me to try GIN PILLS. I did so and after taking a few boxes, I am perfectly well." D. J. LAWLER.

Take GIN PILLS on our positive guarantee that they will cure you or money refunded. 50c a box—6 for \$2.50. Order from us if your dealer cannot supply them. Sample box free if you write us. National Drug and Chemical Co., Dept. N.B., Toronto, 50

## CAMPBELLTON IS ENCOURAGED

All Brick Buildings on Water Street Gives New Town Solid Appearance.

The St. John Standard's Campbellton correspondent sends that paper the following accurate statement of conditions here.

"Campbellton, Nov. 15.—In looking over the town one can scarcely realize that only four months have elapsed since the disastrous fire of July 11th, so great has been the progress made in rebuilding. All along Water street solid business blocks are in course of erection, some of them quite handsome and imposing, while throughout the length and breadth of the town dwellings of all kinds are springing up as if by magic. On the whole the classes of dwellings being erected are more modern in every respect than those destroyed by the fire. Up till a few weeks ago the weather was favorable for rebuilding, but since then there has been a great deal of rain, making it very disagreeable for all concerned.

Contractors have been at a disadvantage from the start owing to the insufficiency of skilled labor as well as the difficulty in procuring lumber to keep up the demand. Many times during the summer for instance, there was not a matched board to be had in the town at any price, even with the surplus stocks of factories and mills all over the country being drawn upon continually. Wages and prices for lumber have, as a consequence, advanced considerably. Bricklayers are being paid from \$4 to \$5 per day, carpenters, \$2.50 to \$4. In spite of

the unusual conditions prevailing, the amount of work that has been done is almost astonishing. It is perhaps more perceptible to the outsider, who drops in for a day or two, and in fact, many travellers have expressed their amazement on different occasions.

## SLOWEST IN WATER STREET.

Perhaps the part of the town that will be slowest in rebuilding is Water street, owing to the new fire district regulations, which will not allow of anything, but a solid fireproof construction on that street. But those who have found fault with the new regulations and said that they sounded the death knell of the town's future prospects from a business standpoint have an incontrovertible denial in the fact that so many fine business blocks are already rapidly nearing completion and that there are many more in contemplation for next year. In fact with one or two exceptions, every business man is planning for a bigger business than ever.

The delay of the Dominion government in dealing with the matter of interest charges on the town's bonded debt, has undoubtedly had its effect on rebuilding operations to a large extent, but now that there is some assurance that the town will be relieved from this burden for a period of years, at least it will certainly be a great stimulus in building operations next season.

## 500 BUILDINGS.

The number of buildings under construction has been variously estimated from three to five hundred, but in talking with the building inspectors, some time ago, he placed the number at about 500. Perhaps a list of those on Water street will be of interest:

Lounsbury Company, large three storey brick building containing offices and warehouses for themselves as well as a store and offices for rental. Leon Cantin, two storey brick building with two stores.

John J. Gray, three storey brick hotel and restaurant.

McRae Bros, three storey brick and stone building, 60x100 feet, with two stores and dwelling.

Edw. Sullivan, large brick office, residence and warehouse.

J. R. McKenzie, two storey brick and concrete store and residence.

H. A. Marquis, two storey brick and concrete store.

Bank of Nova Scotia, three storey brick and stone building.

A. McG. McDonald, two storey brick and concrete building for two stores and offices.

Bank of New Brunswick, pressed brick building with handsome stone front.

Geo. Vermette, large three storey, brick building, with two story ell, for stores, bakery and residence, and suite of offices for rental.

Dr. L. G. Pinaut, fine two storey brick residence and office.

Miss Godfrey, two storey brick store and dwelling.

Joseph Boudreau, two storey brick store and dwelling.

W. H. Wallace, fine concrete residence.

Dr. A. Martin, two storey brick residence and office.

E. David, two storey brick residence and store.

Besides these there are: Wood-working factories of J. & D. A. Harquail; foundry and machine shops of McLennan; foundry and machine works and Duncan Foundry; Jones & Schofield, large brick warehouse and office; Shives Lumber Company, large shingle and tie mill, which will have 20 machines.

## NEW I. C. R. BUILDINGS.

The work on the new I. C. R. shops and roundhouse is progressing rapidly. The walls of the structure were completed some time ago, and the roof is now being put on. A large force of men have been kept on the job since the start under the superintendence of Mr. Burpee, and good work has been accomplished in quick time. There will be accommodation for 25 engines in the roundhouse and the offices and shops in connection will be up-to-date in every particular.

Messrs. Harquail have about completed their contract of building forty houses for the relief committee and nearly every family in town has been provided with winter quarters.

There are a number of tents still occupied, however, by laborers and others who have found it impossible to get lodging in more suitable quarters.

No new cases of typhoid have developed for some time and it is thought there is no more danger of the spread of that disease. Although some alarming reports were sent abroad about this matter, there was really no ground for them, there being no more than forty or fifty cases altogether, which could hardly be avoided under existing conditions.

The work of the relief committee continues and the first fall of snow, which came Saturday brought to their minds with added force their responsibilities. While there is plenty of work the needs of the less fortunate of the fire sufferers will not loom up so large, but when building operations are somewhat retarded by the severe weather and labor is not so much in demand, there may be some suffering and misery.

## True Household Economy

MOTHERS, we owe it as a duty to our husbands and families to take good care of them. We all want, of course, to have our loved ones cheerful and comfortable.

Our dominant part is to give them the very best that we can make or bake. But sometimes we are tempted to save a few pennies in food and think that in so doing we are economising. But is it so? Is this the kind of economy that is wise and profitable? Is it doing our full duty to our loved ones?

## Royal Household Flour

We wouldn't think of buying the lowest priced eggs in the market just for the sake of economy. We would feel that because they were cheap they would be good eggs to avoid. The low price would give us a suspicion of their freshness and quality.

But when it comes to flour, for example, we may be tempted to buy the second best instead of the best because of the few pennies difference in price. We may think that economy in flour is different from economy in eggs. But it isn't. The principle is the same. The difference in cost between the best flour in the

world and ordinary flour is so little that in justice to our responsibility as wives and mothers we can not afford to take chances.

From every point of view Royal Household Flour is more economical than any other. It produces more loaves to the barrel. It is richest in food value. It is more uniform. It is best for Pastry as well as Bread and yields more baked product in either bread or pastry than any other flour.

ROYAL HOUSEHOLD FLOUR furnishes more nourishment, more real food value per pound and per penny's worth than any other flour in the world.

Ogilvie's "Buck for a Buck" will be sent free to the woman who asks for it and sends in the name of her dealer.

Ogilvie Flour Mills Co. Limited.
