## Coal Combinations.

The strongest attacks that the N. P. is compelled to withstand, west of Nova Scotia, are upon the duty on coal. The free traders, or revenue tariffites, or whatever they ought to be called-for they have not yet even given their policy a nameare quite careful when addressing the coal protectionists of the east not to harp upon this particular string; but they fiddle upon it most industriously in this province, particularly before urban audiences. Ontario has no coal fields, unless there be some lying perdu in our newly-awarded territory, but our farmers have generally still their own fuel; therefore, it is upon the denizens of our cities and larger towns that

the coal question is most persistently pressed.
