From Female Ills - Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Belleville, N.S., Canada. - "I doctored for ten years for female troubles and did not get well. I read in the paper about Lydia E. Pinkham's Vegetable Compound and decided to try it. I write now to tell you that I am cured. You can publish my letter as a testimonial. Mrs. SUVRINE BABINE, Belleville Nova Scotia, Canada.

Medical

Another Woman Recovers. Auburn, N. Y .- "I suffered from nervousness for ten years, and had such organic pains that sometimes I would lie in bed four days at a time, could not eat or sleep and did not want anyone to talk to me or bother me at all. Sometimes would suffer for seven hours at a time. Different doctors did the best they could for me until four months ago I began giving Lydia E. Pinkham's Vegetable Compound a trial and now I am in good health."—Mrs. WILLIAM H. GILL, No. 15 Pleasant Street, Auburn, New York.

The above are only two of the thou-sands of grateful letters which are constantly being received by the Pinkham Medicine Company of Lynn, Mass. which show clearly what great things Lvdia E. Pinkham's Vegetable Compound does for those who suffer from woman's ills.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and (answered by a wostrict confidence.

WATFORD, JULY 16, 1915.

NOTE AND COMMENT

This is from the Calgary Herald "A Baptist minister says that the West has gone dance crazy. Which is true in quite another sense than he intended. The West is crazy dancing to the tune of the moneylenders who want their money back.'

Those who criticize the British navy for the part it has played in this war know nothing of what it means to be able to say that not an enemy ship of commerce is today on the seas, and not a German abovewater fighting ship dares to come out of hiding. Britain rules the waves.

"The Canadian Division are some of the finest troops of the English drawn to the upper portion of the walls. Army, and I have heard on all sides from my own people nothing but the highest praise for the military character of these men, as well for their courage and their tenacity as for their discipline," says a special correspondent of the Cologue some of the blue into the orange, there

To the average person who is unacquainted with the operation and the vivid coloring and strong contrasts details of the mining industry the of nature, where against the bluest of details of the mining industry the sight of a miner carrying a cage with a live bird in it into a mine calls forth a question as to why the work-into the little bird. When man carries the little bird. When seems to create, especially where the the facts are known it is readily un- magic of distance is added, a harmony derstood. Scientists have found of colors which within doors would that when noxious gases are present never be tolerated. in mines in such proportions as to endanger human life the little bird will give the warning long before the miner himself is made aware of the in mines in such proportions as to endanger human life the little bird will give the warning long before the miner himself is made aware of the fact through his own senses.

In the daining room shown in the little bird tones, the cold tones, are used for the background, blue and gray paper hangs upon the walls. the rug is blue and gray, and the walls. the rug is blue and gray, and the fact through his own senses. fact through his own senses.

How to Handle a Scheme of Decoration For a Dining Room.

GRAY AND BLUE AND ROSE.

Satisfactorily Furnished Chamber Combines and Contrasts Warm and Cold Colors-Neutral One Toned Wall Paper Creates Excellent Setting For Pictures.

Nothing expresses character or tem perament more openly or ingenuously than the choice of color, for each color in the spectrum represents a diff erent idea, from the high light of yellow down through the cool greens and blues on one side and the warm orange and reds on the other to the shadowy nysterious hues of violet. People choose as their favorite color either that which best expresses them or, in ome mysterious way, its exact oppoite or complement.

Color has been named the "voice of art," and, like the voice, it differs in each individual. No two people ever express themselves exactly in the same way through color, as no two people ever have precisely the same voice in onation

Color is personal and individual, and by its thoughtful use many things may be expressed.

A well furnished room combines and contrasts the warm and cold colors. the cold generally serving as a back ground against which the warmer tones are displayed. A background must not be stronger either in color or decoration than the object to be shown This accounts for the well deserved popularity of the neutral one toned wall paper which creates such an ex cellent setting for pictures, besides displaying the furnishings of the room to the best advantage. Do not forget, however, that the entire room is itself only a background for the social life which it contains, and the scheme of decoration must be subordinated to that idea. The occupants of a room are more important, or should be, than the furnishings.

To create a harmonious setting the tones must be closely keyed, with no large areas of intense color to distract the eye. Indeed, the color scheme of a room may be said to be successful when no one tone springs out to strike the eye before the rest of the room is perceived. A perfect balance of color is restful, while spots which distract the mind are not.

If intense color is to be used it must be confined to very small areas, balanced by larger areas of much less in

placed.

the objects thus perceived must be beautiful in line and interestingly

The interest of a room centers in the lower part, about the level of the eye, which renders absurd any attention Complementary or opposing colors should never be used together in their full intensity. A pure blue and a pure orange have no relationship as they stand, but if they are neutralized. which means that a portion of the orange dye is mixed into the blue and result two softly beautiful tones which

are entirely harmonious.

Attention has often been called to

furniture is painted a pale gray. The color is in the lamp shade, which is of rose, the cushions in the chairs and the pictures upon the walls, which are gay splashes of color, sunsets and sun--color enough in this room to make it glow even before the rose col-ored shade is illumined for the night.

To Clean Sweaters. White sweaters or chinchilla coats may be easily and inexpensively cleaned by placing them in a pillowslip and sprinkling them with 10 cents' worth of plaster of paris. Shake well until the garments look white, then remove, hang out of doors and beat the remainder of the powder out.

GET RID OF BOARDERS.

Dairy Cows That Do Not Pay For Their Keep Should Be Banished.

"At least one-eighth of the dairy nerds in New York may return an anreal net loss to their owners." This is the conclusion of investigators of Cornell Agricultural college from the figures secured in Jefferson county, N. Year long records were obtained for fifty-three dairy herds in that county. Facts were gathered about the quantity and quality of milk and butter fat produced, the costs of feed and equipment, the profit or losses and various other items.

While seven of the fifty-three herds were kept at an aggregate loss of more than \$1,300, or an average loss of \$190 apiece, the average profit on all herds was 31 cents on the hundred pounds of milk, and the average net profit on each cow in a year was \$20.39. These figures indicate that the farmer may make under favorable conditions a litless than two-thirds of a cent on a

The principal cause of loss in dairy-ing is the keeping of cows which do not pay for the food they eat. They have come to be known as lady boarders and serve their most profitable use, according to the dairy experts, when converted into meat and hides. The one way to insure their elimination from the herd, experts say, is to determine the yield of each cow by weight of milk and by the use of the Babcock test for the butter fat content. The formation of cow testing associations is urged upon dairy farmers.

A Common Dairy Loss. A dairy cow weighing 1,000 pounds voids about twelve tons of solid and liquid manure in a year, worth, on the basis of the elements of fertility contained, about \$30. The liquid manure is worth 60 per cent of the whole and is usually a total loss.

Economy of the Dairy Cow. There is no question as to the economy of the dairy cow as a producer of human food. None of our domestic animals can produce similar values om the same quantity of digestible food. The Holstein cow Maid Henry produced at the Kansas experiment station in one year 2,471 pounds of nilk solids. A prime steer weighin 1,250 pounds under test at the Mis souri experiment station was found, when chemically analyzed, to have produced in total solids 547 pounds. These total solids included the entire carcass of the steer, a very large per cent of which cannot be used as food. Every ounce of the material produced by the cow was edible, and the total quantity was nearly five times as great as that contained in the whole body of the

Milk the Cow Early. Milk early and turn the dairy cows to grass in time for them to do their grazing before it grows so hot. They then can lie in the shade and enjoy chewing their cuds during the hottest portion of the day. It will mean greater comfort for the cows and more milk in the pail at evening .- Farm and Fire-

The Profitable Cow. The cow takes a lot of feed on the farm that cannot be marketed at the best of prices and turns it into a commodity' that is always in demand and that brings the top price and can be marketed most economically.

Test the Dairy Cows.
Cow testing pays because it points out to you the profitable and the un-profitable cows. It is only possible to out dairying on a profitable basis when the unprofitable cows are taken from

A READY WEAPON AGAINST PAIN.— There is nothing equal to Dr. Thomas' Eclectric Oil when well rubbed in. It penetrates the tissues and pain disappears before it. There is no known prepar-ation that will reach the spot quicker than this magic Oil. In consequence it ranks first among lintments now offered to the public and is accorded first place

ong all its competitors. Every man imagines that he can put up a convincing argument, but can he? CLEAN-No dust or flying ashes. Ash chutes guide all ashes into convenient pan.

Whose Business?

He was a young fellow riding home on a car. Evidently something had gone wrong at the shop. He was easing his mind to his com-panion. "It's nobody's business what I do off duty," he said. He said it again and again, as though it was the principle of the thing he stood for—"It's nobody's business what I do after hours." The young man felt he was right. He will continue to feel that he is right until some friend or some circumstance shows him that he is wrong. Some day a big man in whom he has confidence, or a big jar which will not bother about his confidence, will show him that it is somebody's business what he does "after hours. It's his own business, first of all. It's his family business. It's his boss' business. That was where his complaint seemed to be; he thought it was not his boss' business. But it is. Why? Because what a man is of in hours' depends on what he is go "after hours." Life isn't divided into compartments. It is like a stream. You can't contaminate the source at night and have it clear and sweet in the morning. What a man can do at 10 o'clock tomorrow morning depends on what he is doing at 10 o'clock to-night. A man's fitness on Monday depends on how he spent Sunday. It doesn't matter what region you take into account. Physically-if you have grippe at night, it modifies your power next day. Morally-if you have high carousal at night, you are "not there" next day. Mentally-if you have jaded your mind at night, your mind will jade you next day. Socially—if you were a fool last night, you felt some de loss of self-respect and per sonal worth today. What you are today is the sum of what you were yesterday and the day before and last year. It affects your value-and that's your boss' business. It affects your power, which is tremendously more important—and that is your business. You can't get away from

Henry Ford, the motor magnate, expects to erect a vast plant in which he will manufacture a traction engine for farm use. Two of these traction engines have been tested on Mr. Ford's farm it have been tested on Mr. Ford's farm, it is said, and have proved successful. They pull wide gang plows, harrows or any other device used in tilling fields or harvesting crops.

it—and you can't get away with it.
