

## "I DON'T SUFFER ANY MORE"

"Feel Like a New Person," says Mrs. Hamilton.

New Castle, Ind.—"From the time I was eleven years old until I was seventeen I suffered each month so I had to be in bed. I had headache, backache and such pains I would cramp double every month. I did not know what it was to be easy a minute. My health was all run down and the doctors did not do me any good. A neighbor told my mother about Lydia E. Pinkham's Vegetable Compound and I took it, and now I feel like a new person. I don't suffer any more and I am regular every month."—Mrs. HAZEL HAMILTON, 822 South 15th St.

When a remedy has lived for forty years, steadily growing in popularity and influence, and thousands upon thousands of women declare they owe their health to it, it is not reasonable to believe that it is an article of great merit?

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

### NOTE AND COMMENT

France is to have one, meatless day a week, what joy there would be in Germany if the people there could get meat even once a month.

Eleven hundred and four merchant ships are to be armed by the United States. Uncle Sam's bristles are growing now.

The Germans are poisoning wells in France as they retreat. Must have decided finally that they won't be back that way again.—Philadelphia North America.

At the present rate of movement one of Count Zeppelin's creations

may yet come in handy to carry the the Kaiser out of the German republic.—Washington Post.

A man in a Western mining camp called, "Hoch der Kaiser," and was hanged at the end of a rope two minutes later. The sheriff cut him down and the crowd made him kiss the Stars and Stripes. Pro-Germanism has suddenly gone out of fashion in the United States.

Judging from the rapidity of the withdrawal of the German troops nearest Paris, the Kaiser has again decided in favor of German cooking for his Christmas dinner.—Philadelphia North America.

New York Evening Sun: There seems to be an excellent chance for a smart United States cruiser or two to go down to the West Indies and round up that German raider which is masquerading as a Norwegian trading vessel and thus luring the ships of the Allies to destruction. We could not begin the war better than by blowing her out of the water.

According to a report from Ottawa the visible supply of wheat in Canada is 116,584,000 bushels. This means a supply of over fourteen and a half bushels for every man, woman and child in the Dominion, and the 1917 crop less than six months from the market. Yet in the face of this bountiful supply, the big milling interests have made the scarcity of the supply an excuse for advancing the already abnormally high price of flour.

Amherstburg Echo:—Some people are evidently not aware that it is a criminal offence to deliberately send false news to a newspaper, especially if it has a personal bearing. A few weeks ago a piece of news coming under this definition was sent in to the Echo office and to this offence was added that of forgery. The signature of the person the item was meant to annoy was signed to the news item. Such work is most dastardly and we are giving warning that any repetition of it is bound to cause trouble for the guilty party.

The abolition of Sunday work in English munition plants is a significant step. Most of the labor discontent that may have existed in the

old land can, it is believed, be traced to working seven days a week. It was not intended that man should so labor. The human frame is not constituted to stand the grind for more than six days without a rest. The man may go along for a time but the strain is bound to tell and the result is a lowering of efficiency and a growing discontent.

If now looks as if the clover crop of Ontario will, this year, be a good average, or something better than that. The acreage is greater than it has been for some years, and the appearance on the whole gives promise of a fairly good yield per acre. Fall wheat is much below the level of recent years in acreage, and the condition of the growing crop is rather uneven, but prospects are for about an average yield per acre. This is the substance of statements made by District Representatives of the Department of Agriculture, who were in conference in Toronto lately, which is borne out by reports of correspondents in various parts of the Province. Some two weeks ago the outlook was most discouraging. As the snow disappeared wheat and clover both presented a healthy appearance, but the hard frost and high winds of early April changes all that. Warmer weather and timely rains have, however, caused another change in the situation, one for the better, and farmers now generally appear to be quite encouraged by the outlook.

### \$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and this is catarrh. Catarrh being greatly influenced by constitutional conditions requires constitutional treatment. Hall's Catarrh Cure is taken internally and acts through the Blood on the Mucous Surfaces of the System thereby destroying the foundation of the disease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative powers of Hall's Catarrh Cure that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHERNEY & CO., Toledo, Ohio. Sold by all Druggists, 75c.

### The Difference Between News and Advertising

News consists of reports of events that have taken place. Notices to take place, is advertising. There are some very estimable people who cannot understand why a newspaper should not give free space to every entertainment which is held for patriotic, benevolent or a religious purposes, and they are apt to think even if they do not always say very mean things when their requests have to be refused. This misconception is due to a very prevalent belief that newspaper space costs nothing, and to a failure to realize that advertising is almost the sole source of revenue of the publisher. There is no more reason why a publisher should give away his goods, even for a worthy cause, than a hardware merchant or a grocer. His space should be dealt with on a business basis, and he should be left free to make his contributions in the form which he prefers, and not have others make them for him.

The world's rarest plant is the silver-sword, a species of cactus, that grows only on the most inaccessible slopes of volcanoes in Hawaii.

Persistent Asthma.—A most distressing characteristic of this debilitating disease, is the persistence with which recurring attacks come to sap away strength and leave the sufferer in a state of almost continual exhaustion. No wiser precaution can be taken than of keeping at hand a supply of Dr. J. D. Kellogg's Asthma Remedy, famous as the most potent remedy for eradicating the disease from tender air passage. m
