

# POTASH

for FIELD, GARDEN, ORCHARD

POTASH promotes maturity and counteracts the effect of an excess of nitrogen in the soil produced by a too heavy application of farmyard manure or from other causes. POTASH is a direct plant food and is indispensable.

Fertilizer Experiment on Radishes by Otto Herold, Waterloo, Ont., 1906

Treatment: Unfertilized  
Result Non-saleable

With Potash  
\$200.00

Without Potash  
\$20.00 per acre realized

POTASH in the highly concentrated forms of Muriate of Potash and Sulphate of Potash is obtainable of all leading Fertilizer Dealers. Pamphlets treating of the cultivation and fertilization of all farm crops will be sent free on application.

## Underwood

The Underwood Condensed Billing Typewriter describes itself in its title. An invoice (and as many carbon records as may be required) as well as the salesbook entry, are made at the one writing.

The salesbook entries are made on a long sheet and are condensed, eliminating all waste space. Both sides of the sheet are utilized; disintegration columns may be added to the right of the total column upon the sales sheet, in which sales can be classified according to departments or ledgers.

We have an interesting catalogue which illustrates and fully explains this and the other special Underwood bookkeeping typewriters. It is worth the trouble of asking for it.
