Prevents Dust~*

## 500,000 Gallons of Tarvia for Brooklyn Borough, Greater New York

The above photograph shows Cropsey Avenue, Brooklyn, where the first experimental tarvia work in Greater New York was done several years ago.

The results were so satisfactory that the authorities have been using more and more Tarvia each year culminating in the huge 1910 order for 500,000 gallons.

Tarvia solves the vexing problems of road maintenance on suburban, state, and county roads where the development of property does not justify brick, sheet asphalt or wood block pavement, yet where the traffic is too heavy for ordinary macadam.

Formerly there has been no middle ground, and the macadam was either maintained at great expense or allowed to rapidly disintegrate.

*Tarviating solves the problem.*

It gives to macadam a slight plasticity so that it does not break up even under automobile traffic.

The surface is clean, smooth, durable and dustless.

Tarvia greatly extends the life of the macadam and reduces maintenance costs so materially that frequently the entire expense of the treatment is saved.

Our illustrated booklet just issued, entitled "Good Roads—How to Build, Preserve and make them Dustless," will be mailed free on request to nearest office.
