STALLIONS FOR SALE.

THE thorough-bred Kentucky stallion, "The Raven," rising 5 years; color, dark brown; sired by "Falcon," he by "Lexington," pedigree furnished in full. He is the best weight carrying horse in Canada, and has proved a good game hero at all distances. Price \$1,200. Also the Trotting Stallion "Fearnought," rising 5 years, blood bay, black points, sired by "Royal George." He is 16 hands high, and a horse of great power and fine action. Has not been trained, yet can show a mile in 3 minutes. Price \$1,000.

Apply to J. MACKELICAN, CANADA FARMER Office, Toronto.
They can be seen at J. Grand's Royal Horse Bazaar, Wellington St., Toronto 3-1t

American Bee Journal.

ON account of the fall in gold, parties ordering the "American Bee Journal" will require to send over this date \$1 75, instead of \$1.50 as heretofore.

J. H. THOMAS,
Agent.

THE subscriber offers for sale the following justly celebrated varieties of potatoes—Early Rose, \$5 per barrel, 165 lbs.; Harrison, \$3 per barrel, 165 lbs.; Early Goodrich, \$2 per barrel, 165 lbs. Delivered to Great Western Railway, at Hamilton, and warranted true and true to name. Orders accompanied with the cash booked in rotation, and filled in the spring as soon as the weather will permit. Address, Lewis STRAINEN, Hamilton, Ont. 2-3t

BEE-KEEPERS

LOOK TO YOUR INTERESTS.

BEE KEEPERS in Canada may rest assured that J. H. Thomas' First Prize Bee Hives are the best made in America. They are cheap, durable and perfect in construction. They have a world-wide reputation. Last season I received orders from England, Nova Scotia, New Brunswick, and many of the States, and from every part of Canada. The demand is increasing yearly. Since they were brought before the public a number of other hives have been brought forward, many of which are entirely worthless; some are good; but not one possesses as many advantages as the Thomas Hive, nor is yet as simple in construction. In a word, as a Bee hive, it is unsurpassed. Send in your orders, always accompanied with the money, and they will receive prompt attention.

I shall continue to furnish Hives at the following rates, which include an individual right to make and use both Double and Single-Boarded Hives, with a full printed description thereof:—

Single-Boarded Hive	\$5
Double-Boarded Hive	\$6
Single-Boarded Observing Hive, Glass in 1 side, 2 sides	\$7
Double-Boarded Observing Hive, Glass in 1 side, 2 sides	\$8

All persons purchasing a Hive at above rates, which always include the right to make, and preferring to order Hives from me rather than make, will be supplied at the following prices:—Double-Boarded, \$3 50; Single-Boarded, \$2 50; or, if ordered in lots of three, to one address, Double-Boarded, \$3 25; Single-Boarded, \$2 25; in lots of six, Double-Boarded, \$2; Single-Boarded, \$2. Individual rights, without the Hive, \$2. Hives sent safely, as freight, by rail to any part of Canada. Three Hives sent to one address for the same freight as one Hive. Bee-keepers would do well to form clubs, and order three or more Hives sent to one address, and thereby save freight.

Hives at the above rates are made with one honey-box. Persons ordering Hives made with two honey-boxes, must send 25c. more for each Hive; with three honey-boxes, 50c. more for each Hive.

"THE CANADIAN BEE-KEEPER'S GUIDE" always on hand. No Bee-keeper should be without it. Price, post-paid, 25c. To parties wishing to purchase territory, I make this offer—Any person sending me ten orders for the Single-Boarded Hive, at \$5 each, from any one Township, will receive in return the ten Hives to fill his orders, and the right of the Township for himself. Now is your chance.

J. H. THOMAS,
Brooklin, Ont.

v2-1-3t

GREAT REVOLUTION IN BARN BUILDING. and Handling of all kinds of Grain, accomplished by John Dennis' Patent Inventions of 1869, by which the following advantages are attained. Firstly—Barns can be built on this system for less than half the cost on the old plan. Secondly—One man and a horse, with the patent Lobo Annihilator, can unload more hay or grain in five minutes than five men can in half an hour. Thirdly—These barns are stronger and handier to unload in, by hand, hay-fork, or Lobo Annihilator. Amount of timber and lumber reduced to board measure to build barns of the following capacity.—For a barn, 32x50, 11,000 feet; 3 barns, 30x50, 17,000 feet; for 1 barn, 50x60 feet, and two sheds, 20x50 feet each, with side walls 24 feet high, and roof half-pitch, 26,000 feet for the three buildings; time to frame first barn, 3 men, 14 days; second, 24 do., and for the large barn and two sheds, less than 5 days. Let no man in the Dominion get out timber for a barn without first coming to Newmarket, County of York, (which will not cost much) and see one of these barns with the two sheds attached, and with the unloading machinery in full operation; he can judge for himself, and after seeing it, if he does not say that it is the best and cheapest barn he has ever seen, I will pay his fare home. Carpenters who are now building barns should secure rights at once, as after these barns are seen no other kind of barns will be put up, for two reasons— they are cheaper and better.
