Drug Reports.

Canada.

During the past month business has shown signs of activity, and although early for a decided increase in the volume of orders, yet reports, especially in the eastern provinces, are exceedingly favorable. The crops in all sections are above the average, and there is every indication of an active business season approaching. The time of "fairs" is on us with all its force, and, as a consequence, trade is fluctuating, the cities and towns everywhere having their good and bad days. There is little to note in the drug market this month. What changes have taken place have, for the most part, shown an advance in prices. Cream tartar has advanced about two cents per pound. Tartaric acid is likewise higher, and tending still upward. Quinine firm, and moderate demand.

Opium remains about at last quotations. This is one of the very uncertain drugs which goes up and down without apparent cause, due principally to the varying advices from the growers, as well as the manipulations of the speculator. Camphor continues to advance somewhat. This product is higher in New York than in England. Sulphate copper is firm, owing to the rise in the metal itself. Cod-liver oil has again advanced. Carbolic acid remains at last month's quotation. Essential oils have all an upward movement in price. Salicylic acid remains very low, and demand light.

England.

London, Aug. 28, 1895.

Business has been dull during the month, but prices remain for the most part unaltered. Bismuth has dropped

during the early part of the month and camphor materially advanced. It is quite probable that both articles will progress further in their respective directions. Quicksilver is firmer, but mercurials unaltered. Cocaine is easier. Opium remains unaltered, and buyers are standing off for further developments. Cream of tartar has, during the past week, advanced slightly, and ipecacuanha is dearer. Balsam of Peru is still very high-priced and in fair demand, and quinine is selling freely at a fractional advance.

A stock of goods without advertising is like a gun without ammunition—there's nothing to make it "go off."

A good ad. tells the people something that they do not know, but wanted to know, without being aware of the fact.

An advertisement—like a cigar—should be so good that the first whiff or impression, will cause a man to finish it.
