Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of VINEGAB BITTERS?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease man is heir to. They are a gentle Purgative as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs, in Bilious Diseases. They are easy of administration, prompt in their re-sults, safe and reliable in all forms of diseases.

If men will enjoy good health, let them ase VINEGAR BITTERS as a medicine, and avoid the use of alcoholic stimulants in every form. R. H. McDONALD & CO.,

"THE ALDINE,"

An Illustrated Monthly Journal, Universally Admitted to be the Handsomest Periodical in the World. A Representative and Champion of American Taste. NOT FOR SALE IN BOOK OR NEWS STORES. THE ALDINE, while issued with all the regularity,

has none of the temporary or timely interest charac miscellany of pure, light and graceful literature; 38 30 and a collection of pictures, the rarest specimens of artistic skill, in black and white. Although each succeeding number affords a fresh pleasure to its 30

friends, the real value and beauty of THE ALDINE 45 will be most appreciated after it has been bound up at the close of the year. While other publications 36

may claim superior cheapness, as compared with rivals of a similar class, THE ALDINE is a unique and original conception-alone and unapproached 75 -absolutely without competition in price or charac-75 ter. The possessor of a complete volume cannot 1 25 duplicate the quantity of fine paper and engravings in any other shape or number of volumes for ten times its cost; and then, there are the chromos, besides ! world-wide reputation, and in the art centres of Europe if is an admitted fact that its wood cuts are examples of the highest perfection ever attained.— The common prejudice in favor of "steel plates," is rapidly yielding to a more educated and discriminating taste which recognizes the advantages of superior artistic quality with greater facility of produc tion. The wood-cuts of THE ALDINE possess all the delicacy and elaborate finish of the most costly steel plate, while they afford a better tendering of the artist's original.
