H1E-3B3

Phone: 514-643-1512
Fax: 514-643-1518

Export Contact: Mr. Bassani Alioscia, General Manager

Marketing Profile

After 35 years in the business of manufacturing packaging equipment in Italy, the president of Capmatic Lte, Lavinio Bassani decided in 1979 to break into the North American market by making high-quality production and packaging equipment for the pharmaceuticals, cosmetics, wine, chemical and food industries.

Capmatic's specialty is the Monoblock system, which can fill bottles and install cap liners and caps on the same base. Custom made to meet the client's specific needs, the state-of-the-art machines even exceed the requirements of the PAG. The company's long list of clients includes Sabex Inc, Proctor and Gamble, Cosmair, Ayerst and Technologies SNC. Capmatic's aim is to be a trusted name in the industry, known for quality machines that are easy to operate, the experience of several generations in Italian technology and its special mechanical system for loading and installing cap liners and caps.

Capmatic's production has more than doubled in the last five years as a result of its expansion into foreign markets, particularly the United States. Expansion is ongoing at present; the company is opening another branch in Toronto and establishing contacts abroad. It provides good after-sale service and technical assistance wherever its machines are in use. The company also stocks a full range of replacement parts for all its machines.

Products/Services Available for Export:
