

Proceedings on Adjournment Motion

Mr. Drury: At the same time I believe the program operated by the Department of Manpower and Immigration, with which the hon. member is familiar, was designed to provide assistance to people while retraining and fitting themselves for the new and highly skilled occupations which can be carried on. I shall communicate the representations of the hon. gentleman to my colleague the Minister

of Manpower and Immigration. I should like to say to the hon. member once again that I share with him the regard the government has for the unfortunate plight of those in the Cape Breton area who through no fault of their own are currently out of work.

Motion agreed to and the house adjourned at 10.30 p.m.
