McGILL UNIVERSITY
FACULTY OF APPLIED SCIENCE

Dean's Office:

FRANK D. ADAMS., PH.D., D.Sc., F.R.S.—DEAN.

MONTREAL April 20th.1921.

Sir Arthur Currie, G.C.M.G., K.C.B., LL.D.,
Principal,
McGill University,
MONTREAL, P.Q.

Dear Sir Arthur,

I have received your letter of April 5th. enclosing an article on Fuel Exhaustion by F.W.Harding of the Canadian Consolidated Rubber Company, Limited, and I have, as requested, written to Mr. Harding with reference to the article in question.

I have also received your letter of April 19th. enclosing a communication from Mr. P.J.Lally, of the Lally Lacrosse Manufacturing Co. Mr. Lally's question with reference to the bending of hickory can best be answered by the Forest Products Laboratory, and I have consequently sent Mr. Lally's letter to W.Kynoch, B.Sc., Superintendent of the Forest Products Laboratories, with the request that he will take this matter up with Mr.Lally directly. I have communicated with Mr.Kynoch by telephone, and he tells me that he thinks he can assist Mr. Lally in his difficulties.

I remain,

Yours very sincerely,

Frank D. Adams
