Every Englishman admits that a great mis-take was made in 1776 and he does not criticize the stand that was taken by the American colonist. It was a defi-ance of arbitrary power which he thore is and arbitrary power which he thoroly endorses, much as he may re-gret it. Contamination of the water supply of the city and of East Toronto is feared by the provincial board of ealth from the new plan to straighten the River Don, whose waters, carrying a large amount of sewage, are to be discharged directly into Lake Ontario thru the proposed channel. Hitherto this stream has flowed into the bay, but the intention is to cut thru the bar enclosing Ashbridge's Bay and close the channel into Toronto Bay. The result, according to the board of health, when the outflow is directly into the lake, will be to endanger the purity of the water south of Balmy Beach, where the East Toronto intake is situated, and at the city intake. The Health Act requires the submis-sion of the plans for every common sewer or other sewage project to the board of health. The board, in this instance, owing to the importance of the matter, has instructed the secre-tary De Hedgetts to communicate the matter, has instructed the secre-tary, Dr. Hodgetts to communicate with the city authorities, and to obtain particulars of what is purposed. As a heavy penalty is provided for any vio-lations of the regulations, or such as would cause a menace to the public health, it was thought to be more considerate to take this course. It is probable that a conference of the city officials and those of the board will result.

## A Cambodian Critic,

A queer diary of the King of Cambo-dia's French tour is being written by his majesty's lord chamberlain, for publication when the royal party re-turns to Puompenh, the capital of Cam-bodie

By the help of one of the king's in-derpreters I have obtained extracts from the diary, from which it appears that the lord chamberlain thinks many that the lord chamberlain thinks many things are awry in France. "The French people," writes the lord chamberlain, "talk a great deal, all talk together, and women interrupt their husbands without fear of punishment. "Very little respect is shown to peo-ple in high places, and even servants speak to them without prostrating themselves.

speak to them without prostrating themselves. "But most people are rude in France, and the rudest are the men who make pictures. Many of these persons have not even refrained from threatening the sacred dancers of the king with the machines they carry in boxes. "Everybody wears far too many clothes, and they are worn all day long. Many wear numbers of unnecessary garments, especially the women.
