

The T. EATON CO., Limited. Canada's Greatest Store. The T. EATON CO., Limited.

Saturday's Interesting Programme

At Canada's Greatest Clothing Store.

We use that phrase, "Canada's Greatest Clothing Store," thoughtfully—and not in the spirit of idle boastfulness. It expresses facts just as you'll find them, if you make intelligent investigation and comparison. Take whatever point of comparison you wish: Variety of styles, completeness of assortments, excellence of qualities, workmanship and finish, and above all, value-giving and satisfaction-giving, this store leads and excels. You'll not find anything in Canada to equal it. It's your privilege to make personal investigation. In justice to yourself you OUGHT to prove our claims. As an inducement for doing so we suggest these Clothing attractions for Saturday. At the same time we emphasize our guarantee to refund money if not satisfied with your purchase:

Boys' Overcoats

Boys' Overcoats with detachable capes, black and dark brown tweeds, buttoned close to the throat, checked tweed linings, sizes 22 to 28. **3.50**

THE NEW PEAT FUEL.
The attention of the readers of The World is directed to an article on another page, giving a full description of the new process for converting peat bogs into fuel. In a word the process is this: The raw peat is dug out of the bog, then dried, next pulverized, and finally pressed into small cylindrical bricks, the size of an average lump of coal. These bricks are made under a very high pressure. The product is a solid substance, perfectly dry, that burns easily and freely, gives very little ash, and throws out as much heat as a corresponding weight of anthracite. This peat fuel can be produced, so we are told, at a surprisingly low rate, but it is not probable that it will be sold for less than \$3 or \$4 a ton, when it is first introduced. Later on, when the article is produced in large quantities, it is expected that the fuel will be sold for between \$2 and \$3 a ton. There are unlimited areas of peat bogs, not only in this province, but all over Canada. And if this process is a success, as we believe it is, then Canada is independent of every other country for her fuel supply. This is of particular importance to Ontario, which has not a pound of coal of her own. The fact that the peat bogs are distributed in different parts of the province will reduce the cost of freight to a minimum. In very few cases will the finished article have to be transported more than 100 miles to the point of consumption. The production of the new fuel is patented, the patent consisting in the fact that the peat is compressed in a dry condition. Hitherto all attempts to convert peat into a satisfactory fuel have been based on the assumption that it must be compressed in its original state when it is full of moisture. The novelty in the Dickson process consists in the elimination of the moisture before the material is put into the compressing plant. The World trusts that the capitalists who have invested their money in this enterprise will meet with the largest measure of success, for their success means a great benefit to the entire country.

NEXT HE ROASTED MR. HARDY.

Rev. S. S. Craig May Well Be Called the "Fighting Parson"—He Strikes Out.
Rev. S. S. Craig, the "fighting parson," put in a good hour at the Guildhall evening sticking pins into Premier Hardy for having, as he charged, betrayed the people. These being no love scenes in the play, the matinee guy stayed away, and the house was composed almost entirely of grizzled warriors in the industrial ranks and young fellows just putting their hands to the wheel.

The lecturer remarked that Premier Hardy's handiwork was as grim and terrible a tragedy as any book they had ever read. "We do you at the judgment day," he exclaimed, "for not relieving agriculture of its terrible burden, for allowing transportation monopoly, for withholding genuine education and for not relieving the internal cruelty of the money power." He knew of one bank he said, where from 40 to 100 per cent. was being charged.

TAXES MUST GO UP.

Finance Minister of British Columbia Has Found a Debt of a Million Dollars.
Vancouver, B. C., Dec. 8.—The Finance Minister, Hon. P. C. Cotton, has created quite a sensation by declaring that the Turner Ministry has left a provincial debt of \$1,000,000, whilst the province may also be compelled to take over the Guaranteed Fraser Valley Drying debentures of over \$800,000.

The land owners primarily are liable to declare that they cannot pay the debenture interest. Mr. Cotton says that it will be extremely difficult to avoid considerable addition to the provincial taxes.

FREE!
Weak Men Restored Or No Expense for Treatment
A course of remedies—the marvel of medical science—and Apparatus endorsed by physicians will be sent ON TRIAL, WITHOUT ADVANCE PAYMENT. If not all we claim, return them at our expense.

Men Who Are Weak, Broken Down, Discouraged, men who suffer from the effects of disease, overwork, worry, from follies or excesses, from unnatural drains, weakness or lack of development of any portion of the body, failure of vital forces, unfitness for marriage—all such men should "come to the fountain head" for a scientific method of marvelous power to vitalize, develop, restore and sustain. On request we will send description, with testimonials, in plain sealed envelope. (No C. O. D. imposition or other deception.) Address
Erle Medical Co., Buffalo, N. Y.

the legs for about a minute, in order to allow the blood to settle in the necks, when they are handed to nearly 200 men, women, boys and girls, who commence plucking while the turkeys are quite warm. After this process, they are laid on two double rows of shelves running nearly the length of the building, on which the writer saw 2400 fine birds at one time, weighing over 12 tons. As soon as sufficiently cooled, they are wrapped in paper, and carefully packed in cases containing about a dozen birds. Although the close of the present week or beginning of next will witness the last shipments for the Christmas market, this new industry may continue into March. The above extensive shipments constitute the order of only one London firm, which affords some idea of the extent to which this branch of our exports may be prosecuted.

THE TORONTO WORLD

CANADA FIRST—AND LAST
Just One Thing That Canadians Will Not Stand.
NO FORCED HUMILIATION.
They Will Not Allow England to Win an Ally in the U. S. by Giving Away Their Rights to That Republic—Canadians Made Canada, Not England, Says Mr. Stinson Jarvis.

Editor World: Let me say a few words about your editorial under the heading of "Canada First" in your Monday's paper. In the last fortnight I have been wishing to send you a letter embodying similar views in regard to the conference at Washington. You have taken care to keep our point well in view, that the present understanding between England and the United States is something to be desired and sought, but you have insisted that the interests of Canadians shall not be sacrificed for the purpose of pleasing the Americans. The reasons you give for fearing that this may happen seem to me well taken. That such an event might become a part of our Canadian history seemed prophesied by what occurred in Sir Wilfrid Laurier's visit to England, and it is not to be doubted that Canadian rights and prejudices in regard to the United States are regarded in England as a mere annoyance—a small obstacle in the way of her chariot wheels, which may well be pushed aside.

Canadians Made Canada.
Probably all Canadians agree that it would be a good thing to have the more commercial difficulties settled. But not at the cost of humiliation, not at the cost of seeing an ancient enemy triumph at the Canadian's helpless acceptance of the inevitable. We have been brought up under the English flag. We have been proud to consider ourselves a part in the English Empire. But it was the Canadians that made Canada, not England. We did not become a nation or influence protect what Canadians made. When the United States allowed ruffian hordes of the lowest Irish to drill within her confines for the purpose of making Irish grievances an excuse to invade Canada, and when this came from the gutters of a hundred cities commenced their brigandage in our country, was it English soldiers that drove them out? God, Peacock and his regiments could not be forced within 16 miles of the scene of action. Not it was the best blood of Canada that bore the brunt, and those who remember the long line of black-draped coffins to the old drill-shed at Toronto do not forget the hour when Canada wanted England's paid fighters, but did without them.

Another Canadian Annoyance.
At that time the British Minister at Washington protested, but there was no correspondence from England—containing a threat of war because of the American harboring and arming of those drilled and fully-equipped regiments of murderers. There was no demand made for compensation to the families of those who were left destitute when the bread-winners were killed. England shut her eyes. It was another Canadian annoyance.

Times Have Changed.
Well times have changed. The United States is very much changed. Charles A. Dana of The New York Sun is dead. He who is said to have written a book in favor of anarchy, and whose paper printed all that could be said to foster Irish-American hatred for England and all that could be written by Goldwin Smith for the dismemberment of England, is dead. The changes of view against The New York Tribune, which invariably speaks the conviction of the best classes, have been invaluable to both nations. American wealth has produced travelers and educated people, and the new ambitious necessary in the growth of every great nation have not been bridled by the precepts of the earlier politicians, but have leaped out to acquire distant lands. For the first time in the history of the country, it has need of diplomats and alliances. It is need of England's opportunity, and after enduring studied insult and affront for over a hundred years, England says: "Come to my arms, I love you."

Canada Won't Stand It.
No doubt that is extremely wise, no matter how trying it may be to suppress our sense of humor, and what Canadians want to know now is, How great is this great love that was born of insult? Is it worth more than one's own child? It looks as if Canada already lay bound to the altars of the Mount in Moriah. But Abraham had to seek another victim. Even the Lord God couldn't stand that kind of a sacrifice, and neither will Canada. Besides, this is a sacrifice to Moloch, and the possible Isaac would have better biblical backing for objections.

How Canadians Feel.
If I at all understand the people among whom I was born, I believe they will give England almost all but one thing. They will give her soldiers, sailors, hardy men for general work, loyalty and preferential trade. If asked, they would probably give her a fixed sum annually to assist in the expenses of the protecting navy, but they will not allow England to win an ally through the giving away of their rights or by forcing humiliating concessions to the United States. And yet the source of immediate danger may perhaps be not distant, but in Canada's own representatives, who can certainly buy further and better titles by giving away their country's valuables. It is only a few short years since Laurier's party, in order to get into power, conspired to sell the independence of Canada to the United States, and since then some of the tools, including J. D. Edgar (Sir James—God help us!) have been made comparatively English with titles. There is no end to the titles that England can bestow. There is no end to the worship that these can command. Let The World tell the honey-tongued gentleman at Ottawa that so far as Canada is concerned he will stand or fall by what is done in this matter. Simeon Jarvis.
