TICULARLY THE OTHER ONE.

dividual himself. The parasite comes from without and finds a longment in the hings, just as the San Jose scale finds its longment in the fruit tree.

of trees that are attacked. Why doesn't the Government do something to eradicate

the establishment of this sanatorium was a purely private undertaking. It was a

duty voluntarily assumed by certain philanthropic individuals who realized that the

people of this country were being pittlessly decimated by a scourge without any effort

being made to save them. Fifty thousand dollars was subscribed and expended in

the establishment of the sanatorium at Gravenhurst. That institution has been in

it is begun in time and consistently kept up. It has proved that infected persons

have been awakened to the importance of declaring war upon an enemy that has

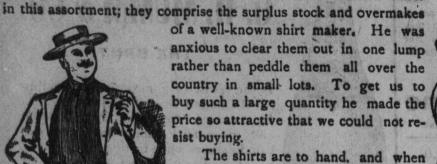

Some few years ago an insect pest, known as the San Jose scale, invaded this

### T. EATON CO. Canada's Greatest Store.

STORE CLOSES TO-DAY AT 5 P.M.

## A Big Scoop in Men's Summer Shirts

Buying chances like this are not of frequent occurrence, but when they do come to the surface this is the store that gets first chance to buy. We certainly made a "scoop" in getting these Summer Shirts. There are over ten thousand shirts

you see them you'll be as eager to buy as we were. The summer is hardly half over, and yet we're going to sell:

75c Summer Shirts for. . . 47c \$1.25 Summer Shirts for. . 47c \$1.00 Summer Shirts for . . 47c \$1.50 Summer Shirts for . . 47c

The collection includes nearly every desirable style and fabric for summer wear;

Men's Shirts, made of fine imported zephyrs, cambries, madras, cashmerettes and flannels, in up-to-date styles, with laundried and negligee bosoms, and some with colored front and cross-stripe bosoms, some have collars and others are without, many have two collars, some have cuffs attached, while with others you get detached cuffs, the newest patterns in blue, mauve and pink stripes, checks and plaids, in a full range of sizes from 14 to 17½, shirts that were made to sell at \$1.50 apiece. Your choice

On Thursday morning we commence selling these shirts. Extra space will be provided, and being discernible only thru the microscope. The San Jose scale attacks a tree, extra salespeople to wait on the crowds that will come after these shirts. It's the chance of The bacillus preys on man, and principally on the lungs. Each is equally deadly, the season, and few visitors will leave the store without two or three. If you cannot come the necessary precautions are not taken. The scale gets its lodgment in trees, thru in the morning, come at noon or in the afternoon. But the sooner you get here the better the agency of nesting birds, strong winds, horses and workmen engaged in the

This August Sale of Furniture is all the more important human beings that are attacked? To all intents and purposes, the tubercle bacillus because of the fact that furniture is more expensive now than may be regarded as the San Jose scale, with this exception, that it is men instead it was some time ago. It costs more to make good furniture, the San Jose scale that is every year killing off thousands of human victims in this and the material costs a good deal more. Yet we have made province? If an apple tree is worth \$5, what value shall we place on a human life? it possible to sell reliable, up-to-date, well-made furniture at prices that surprise the trade. A few proofs of that fact:

Estimating each individual who succumbs to consumption merely as a wage-earner, it would be well within the mark to value his worth to the community at \$2500.

Last year the deaths from consumption in Ontario were 3405. The financial loss to the province, on this estimate, would be \$8,512,500 yearly. This does not include the tended foot end, in sizes 3 ft., 3 ft. 6 in. ]

extended foot end, head 48 inches high, fitted with patent ball bearing brass castors, in sizes 4 feet, 3 feet 6 inches and 4 feet 6 inches wide; extra and 4 feet 6 inches wide; extra special; August sale price ..... 14.90

The fitted with patent ball bearing brass with patent ball bearing brass with heavy moulded rim, extends to 8 feet long, August sale price ..... 4.25

A question that naturally occurs to one in connection with these two pears is this: Why should the Government take such prompt and effective measures for suppressing the one that preys on fruit trees, while it makes no effort to check the one which fastens itself on the vital tissues of the human body? No such legislation as

INDUSTRIAL EXHIBITION.

Large Amount of Business Transacted at Their Regular Monthly Meeting Held Yesterday. pest became generally known among fruit growers. When the destructive nature of the San Jose scale was fully realized by the agricultural community, there was consternation in the camp. Emergency meetings were called, and the entomological experts of the province were set at work to determine the best method for fighting The regular monthly meeting of the I and subduing the pest. It did not take the Government long to devise machinery for day at the offices, 82 East King-stree thecking the ravages of the dreaded insect. An act to prevent the spread of the President Andrew Smith being in the chair. San Jose scale was passed in 1898. This act prohibited the importation of any plant Manager Hill read a letter from the Gov infested with the scale; prohibited any person from keeping such a plant or offering it for sale; compelled everyone having reason to suspect that any infested plant or-General regretting his absence in th found to be infested; conferred on the inspectors the right to enter property for the tion closed he would certainly attend. stated that a convention of manufacturers would be held in Toronto on Thursday, Aug. 30. The Board thereupon determined to lavite the ladies of the delegates to the convention to attend the Exhibition, to be present at a tea given in their honor and to accept seats in the grand stand in the evening. The day following will be Manufacturers' Day, when the Executive of the association will be entertained at lunch. It might here be mentioned that Wednesday of the first week will be School Children's Day, Thursday Historical, Proneer and Patriotic Day, Friday Manufacturers' Day and Saturday Ladies' Day. On the recommendation of the Manufacturers' Committee it was decided to take the disagreement of the more material part of the Exhibition. Mr. Hill strated that Director-Genieval Buchaman of the Phn-American Exposition, Mr. Hill strated that Director-Genieval Buchaman of the Phn-American Exposition, Mr. Hill strated that Director-Genieval Buchaman of the Phn-American Exposition, Mr. Hill strated that Director-Genieval Buchaman of the Phn-American Exposition, Mr. Hill strated that Director-Genieval Buchaman of the Phn-American Exposition, Buffalo, had, called on him that day, and requested permission to pledge a tent on the grounds for the purpose of distributing literature. The board decided that if the Fan-American would give them a tent wherefrom to circulate literature next year they could have a tent to do the same this year. A letter was read from Premier Ross consenting to officiate at the opening of the Exhibition on Tuesday, Aug. 28, Mr. Hill presented the report of the loss the board had sustained in the death of Second Vice-President Close, Several gentlemen testified to the esteem in which Mr. Close was held, and Mr. Davies nominated Mr, J. I. Hobson, president or the Canadian Cattle Freder's Association, as his successor on the board. This was carried unanimously, and Mr. Hobson was made chairman of the Dairy Products Committee and a member of all the committees on which Mr. Close was held, and Mr. Davies to 30 days. The dread of the pest grew more serious in the following year, 1899, and, to assuage the public clamor, the Government appointed a commission to report on the best methods for suppressing the evil. One hundred and sixty-eight witacsses were examined under oath. The commissioners presented their report in September, 1889, and submitted twelve recommendations for prompted by the anticipation of financial loss among the fruit growers and farmers. If the spread of the scale had not been checked, thousands of trees, valued at anywhere from one to twenty dollars each, would have been destroyed. In the face of such a dread possibility, the Government had no other recourse than to pass emergency legislation, involving the province in a big outlay, both for inspectors and for the destruction of infected trees. It is satisfactory to know that the prompt action of the Government has been successful in checking the spread of the if unchecked. The scale will kill a tree. The bacillus will kill a human being, if

on which Mr. Close officiated. The election of Mr. W. K. McNaught as second vice-president in lieu of Mr. Close closed the proceedings.

SERIOUS LAPSE OF MEMORY.

Collision at Madoe Junction Was a the Result of It.

Beleville, July 31.—The inquest into the collision at Madoe Junction on Thursday last was concluded last night, and the jury returned a verdict that the occurrence was due to lapse of memory on the part of Conductor Kerr and Engineer Maybee of the Madoc train in running on the time of the Peterboro train.

SIFTON CASE HELD OVER.

London, July 31 .- Owing to the absence of County Crown Attorney Magee in Stratford, no witnesses in the Sifton case were examined to-day. The investigation will soners continue obserful. They are kept in separate cells in different parts of the jail, and thus have no means of communicating with each other.

Electricity as Medicine.

Dr. A. C. Sanden's name is known in thousands of households, and his studies and researches in that mysterious power, electricity, have made him famous, The knowledge that he has gained has beneuized suffering humanity, and that sage interrogation, "What higher aim can man attain than conquest over human pinn?" has evidently been his motto thru life.

The wonderful curstive powers of electricity are well known to the medical profession, and the great strides that have been made in this branch of science are astounding. Dr. Sanden's melical of applying cloud in the sufferers sent on their way repointed. Charles Lambton, Lieut-Col. commanding 2nd Batt., 5th Fulliers.

THINGS LOOKED THREATENING and other appliances have wrought seem almost like miracles. Cases that were apparently hopeless have been compared and the sufferers sent on their way repointing. He has done and is doing a work that is of truly autonal importance, and unquainfied success has crowped his efforts.

In Toronto, Dr. Sanden's offices in the Dinnen Building are daily the Mecca of scores of people in search of assistance, and latterly they have kept on increasing to such an extent that he has been compared by the succession of the provided to the public to visit them, and those in the built-ray of the business, will gaildy give those calling any information about the beits, etc., that are handled.
