TAXATION NO HARM TO MINING PRICES

Considerable buoyancy on the New York market failed to give any impetus to the Toronto stock exchange, and the market dragged thruout the day with almost no change in quotations, and with a very slim volume of business.

The regular declaration of dividend of Steel of Canada improved the bidding for this stock, but made no special inquiry for the shares. Dominion Steel was around the prices of the previous day. Mackay, General Electric and C.P.R. were each traded in at prices which represented no nominal change.

Papers were equally dull with the other stocks and in the case of Abitibithe price was lower. Some action as to dividend on this stock is looked for rext week. There was a fair market again for the war bonds, but supplies were available in this department at steady quotations and there was no changes to report otherwise than fluctuations as between full board lots and lot steady with small transactions.

Wheat Prices Strong at Open-

IRREGULAR TRADING

ON WINNIPEG MART

Winnipeg, March 18.—In an irregular trading market today, in which a fair volume, of husiness was transacted, prices were mostly stronger at the opening on reports of crop damage in the south and some export demand. Cash premiums were nine cents over at one time for top grade wheat, but in the latter part of the session the demand appeared less urgent, and the premiums broke to 3c. 5c and 1c over the May. The offerings were light at all times, and it was hard to estimate the strength of the demand.

In the future markets there was little buying of an investment nature, the market closing 1c to 1%c lower. In local trade, the belief is still held that our prices are out of line with Chicago. In the coarse grain markets little activity is displayed, the demand being easily satisfied. Oats closed %c to ½c lower, barley 1c lower, flax %c lower, and rye unchanged.

DOME, McINTYRE and HOLLINGER appear attractive purchases at current prices, and with ample power supply expected in April, we believe these dividend - paying issues will quickly advance to much higher prices. Company earnings are about due for a big boost, and buying at once appears wise.

Every shrewd investor should have a copy of our specially prepared analytical reports on these companies.
