

Louise French - ward of the Children and Society - hope to locate her friends and send her home.

Several cases of eczema - from impure blood - aggravated condition left by the "Flu"

Farm and Garden.

Robert Curley left team in field it got tangled with plough - both horses thrown down - one is badly cut - the vet has treated her over a month. Earlier in the season his brother Louis Curley left team with harrows, the horses ran away, smashed the harness and injured both horses.

We threshed 218 bushels of Spring Wheat - it was shrivelled because of the draught - sold some to the mill at 3 cents a pound - found they resold it as chicken feed at 4 cents. As we put odd in the paper to sell at 3 1/2 cents at home, 4 cents delivered. It is selling fast. The oats we sowed in March 288 bushels some excellent - rest have not been threshed but is all drawn in - will be light and the straw short.

We had to buy a new binder - as the old one took 3 times too long to cut - and had frequent breakdowns.

Our pigs have been troublesome - breaking through the old fences, have done damage to our garden and grounds and to the neighbors.
