The argument in Koksilah vs. the Queen was continued to-day before the Full Court, and after luncheon the Court decided to adjourn the further hearing until all the judges can sit. This afternoon Regina vs. Ah Sin is being heard. The Chinaman at the assizes was found guilty of indecent assault on a little girl, and as the evidence was unsatisfactory His Lordship the Chief Justice reserved the case for the Full Court.

EMPIRE BY GOOD WILL.

Pall Mall Gazette: "Daughter am in my mother's house; but mistress in my own." With every day of this wonderful June it becomes clearer and clearer how happily Mr. Kipling's lines struck the key note of the gathering of 1897. Canada, to whom they were directly applied, is at this moment the most striking example of the imperial idea, by reason of the turmoil of her past, the unique fusion of the races and creeds in the present, and the omen for the future given by the proposals of the Laurier ministry. And Mr. Laurier's speech last night contained the kerne of the whole matter. "It has been said that perhaps the time might come when Canada might become a nation of itself, My answer is simply this-Canada is nation. Canada is free, and freedom is its nationality." What is true to Canada not recognized, and two frank and sigtionary manner, to emphasize the 'imthe term. Lord Salisbury owned that, as a Tory, he had shared the misgivings with which many regarded the setting up of colonial self-government. Both admit the mistake like men and Greater Britons. Both errors would not have been errors once; nor do we hesitate to say that the responsibility for all that was weak in the imperial ties lay mainly. if not quite entirely, with the mother country. The first generation of colonists retains the feelings for the home land which it took out with it: but a new "native born" generation springs up, which lacks the full force of these. Gradually an impression grows that the colony is nothing but a dumping ground and a market to the people at home,
