A GRAND RUSH COLPITT'S PHOTOGRAPH GALLERY. Everybody Delighted With the Pictures and also the liberal offer that is made at the above place.

Photographs FROM \$1 TO \$3 PER DOZEN. Notice—My Photos, are all made from Retouched Negatives and beautifully finished. No stop work done by me. Call early and avoid the rush. Rooms—Opposite Masonic Hall, Chatham, N. B.

BUSINESS NOTICE. The 'MIRAMICHI ADVANCE' is published at Chatham, N. B., every Thursday morning in time for despatch by the earliest mails of that day ...

Miramichi Advance CHATHAM, - NOVEMBER 20, 1879. Lumber in Great Britain. We have Messrs. Farnworth & Jardine's Liverpool Wood Circular of last week, which gives a more discouraging view of the lumber market there than previous advices led us to anticipate.

The arrivals from British North America during the past month have been 43 vessels, 32,780 tons, against 46 vessels, 38,619 tons during the like period of last year, and the aggregate tonnage since 1st February for the three years is—1877, 504,859; 1878, 336,279; 1879, 282,525. The consumption since the 1st February shows a great decline compared with previous years, being viz.:

Timber Cub. ft. 77,808,000 108,771 Standards. 78,528,800 105,547 " 79,490,000 78,628

It is evident that a determined effort to reduce the supply of Spruce deals from this side must be made, if the lumber trade is again to become remunerative. A few weeks ago, when a few sales indicated an advance in price there was a rash rush in several directions by those interested in the trade.

Another Exposure of Sir John's Cowardice. Referring to the Marquis of Lorne's despatch to the Colonial Secretary on the Letellier affair the Sentinel says:—This document puts clearly the position assumed by His Excellency as a statesman, opinion, came from Sir John. In view of the whole subject his own words revealed, and the first decision of Lord Lorne, and the later exposure of Sir M. H. Bech, both of whom are disinterested underlings in the case of the constitutionality law bearing upon it, one fails to understand, at least, any justification for the terms in which Mr. Letellier is referred to by some portions of the press outside of Quebec.

Hon. Mr. Blake Elected. Hon. Edward Blake was elected by acclamation for West Durham, Ont., on Monday last and made a three-hour speech. He announced himself as a party politician, but not a blind partisan. He alluded to the history of the Liberals, both in England and Canada, and said to read the history of their achievements made the pulse to quicken and the heart to glow.

Everybody Delighted With the Pictures and also the liberal offer that is made at the above place. Just think of it! 2 Large Size Tintypes for 25 Cents. Remember these are not the little heads, but FULL SIZE CARDS from sitting and standing figures.

Photographs FROM \$1 TO \$3 PER DOZEN. Notice—My Photos, are all made from Retouched Negatives and beautifully finished. No stop work done by me. Call early and avoid the rush. Rooms—Opposite Masonic Hall, Chatham, N. B.

bls the men who brought shame on the country. He did not believe another Pacific Scandal would ever take place in a similar way, but he believed that a certain club interested in Conservative principles would dispense the money to bribe electors instead of the chief himself. He discussed the necessity of economy in public expenditure, the operations and tendencies in the national policy, and the desirability of reforms in the constitution of the Senate and the representation of the people in Parliament.

A Ramostration. An advertisement, published yesterday, emanating from the Department of Railways and Canals, calling for tenders for snow-plows and cars of different kinds, indicates a change of railway policy which can hardly be deemed an improvement. The Government has provided expensive buildings and machinery for the express purpose of manufacturing such articles, but for reasons which the public will not deem sufficient, they determine to leave their machinery idle and purchase what they need from outside parties.

The arrivals from British North America during the past month have been 43 vessels, 32,780 tons, against 46 vessels, 38,619 tons during the like period of last year, and the aggregate tonnage since 1st February for the three years is—1877, 504,859; 1878, 336,279; 1879, 282,525. deavored to evade this point of the question, but the editor of the ADVANCE told him squarely that it was the key to the whole situation; that if it was his intention, now that he was a member of the New Brunswick Government, to address public meetings and canvass personally for the protectionist candidates, as he had theretofore done, he could not expect the support of the ADVANCE for himself or his Government, and must expect a formidable opposition to his return as Surveyor-General. He was made sensible of the fact that a well-organized party, many of whose adherents had voted for him, would soon convert these who had been passively indifferent personal friends into active, working political opponents. And he had already learned that there were many of his own political party who looked upon his new alliance with Mr. Young as a gross breach of political faith and violation of principle, and that these would join with the friends of the ADVANCE in securing his defeat, should opportunity be afforded to them.

Mr. Adams realized the situation thus presented, and assured the editor of the ADVANCE that if it could be so arranged that he would be returned by acclamation, he would refrain from taking an active part in the Dominion Election and that while he would probably vote for Mr. Mitchell, he would be absent from the County during the canvass, and where in Canada he might be engaged in his behalf, nor canvas for him. He was told that such an arrangement could be made and it was there and then agreed upon.

The ADVANCE and its friends kept the pledge made to Mr. Adams and he was returned without opposition. No cober, however, was his re-election and the position of Surveyor-General thus secured to him, than he commenced a systematic violation of the pledge made to us and also to those of other leading Liberals in this Country. We need not refer to the extraordinary one he made of the Chatham Railway matter, causing the Government to place itself in a false and ridiculous position, further than to point to the fact that Mr. Adams, in that matter, did not hesitate to attempt the perpetration of what he knew to be a great wrong, and to do so in the face of public opinion and the protests of his own public patronage and appeals to religious influences which he had, but a few weeks before, invoked against the very Government of which he was now a member, he did his utmost to secure Mr. Mitchell's return. As if determined to win a success with which he pledged to abstain from doing, he sought to get the support of the public opinion and the protests of his own public patronage and appeals to religious influences which he had, but a few weeks before, invoked against the very Government of which he was now a member, he did his utmost to secure Mr. Mitchell's return.

On 30th inst., we published the following:—'CITY LOYS FREE' is the title of an advertisement in another column. People are promiscuously many, and the Western States and things out of the usual course happen there, and while the Denver and Colorado are the one or promise of their offer, it would be well for any who feel inclined to secure lots from them, to be especially careful. We are now informed by the advertising agent through whom we received the advertisement that the company is a fraudulent one and we hope our warning has prevented anyone in this quarter from sending them money.

The 'ADVANCE' and the 'N. B. GOVERNMENT'. A number of persons friendly to both the New Brunswick Government and the ADVANCE have, of late, directed our attention to the fact that several provincial journals are indulging a habit of representing this paper as one strongly opposed to the former body. We had observed some of the representations referred to, but did not place a sufficient value upon them, until we read, in the issue of the 17th inst., a paper, which, principally because the papers, were, were of the more obscure class, and the writers were evidently prompted by individual members of the Government, rather than by a regard for the Government as a whole. It may not be amiss, however, to refer to 'the situation' in this respect, so that there may be no misunderstanding.

At the time the paper was established it was not unfriendly to the Government, and up to the time of the General Assembly Elections of 1878 its support had changed from a negative to a positive character. During the year 1878 changes took place in the organization of the Government and both of its representatives resident on the North Shore changed, and the ADVANCE, through their desire to actively oppose the party in Dominion politics with which we were allied. The gentlemen referred to—Hon. Robert Young, President of the Executive Council and Hon. Michael Adams, Surveyor-General—could not reasonably expect further support from us, when they were using all their personal influence, as well as that which they possessed as sole disposers of Government patronage at the North, to secure the defeat of the Liberal party and the Liberal candidates in this and the adjoining County. More than that, just after his acceptance of the position of Surveyor-General, Mr. Adams called upon the editor of the ADVANCE and talked with him as a friend of the Local Government and one who had voted and personally solicited votes for him. Mr. Adams knew that his acceptance of a seat in the Government, was inconsistent with his former professions, and he stated it was no pleasure to him that the Government should fall on such a record. His feelings were that the honor of Canada had been snatched by that public crime, and it was no wish of his that the Liberal party should succeed to power then, believing as he did, that the result of unwise Government on the part of the Tory Government would be wholly responsible for the extravagance and waste in carrying on the Government. He referred, briefly, to what he called a mistake by the Cooperatives, in not holding responsi-

ble for the extravagance and waste in carrying on the Government. He referred, briefly, to what he called a mistake by the Cooperatives, in not holding responsi-

It is well that political bitterness, which have been engendered through excessive and without the faint of dishonor, should be forgotten, but in this Country, at least, there are those who once rallied to the support of the Local Government to whom it will call in vain when the day of battle next comes. This state of feeling is not so much due to the peculiar circumstances attending the reorganization of the Government, as to the fact that Messrs. Adams and Young, since they became united by a common bond of political trickery and fraud. Their hold upon the local political mind that people do not care to look beyond which they are voters by them.

For nearly a month the number of the Government, personally, we entertain very friendly feelings, and, on that account, regret that they have fallen into such bad North Shore company as we have shown Mr. Adams to be. So long as they are willing to be guided by him, they must share the odium which attaches to his offences, and they will, no doubt, learn, when, perhaps, too late, that he will play them as falsely as he has his former friends at home. Had he not proved so entirely unreliable and faithless in his dealings with those whose respect he will yet bitterly regret having forfeited, he might have retained their support and in time, sold them into a formidable backing against the Government's opponents. But, now, it would take tenfold the political merit yet discovered in either party to cause the majority in this Country to forgive their determination to punish Mr. Adams' double dealing and treachery. The Government is, therefore, entitled to sympathy in having to do with the sinners and scoundrels of a new member who has proved so reproach and source of weakness to it.

U. S. CORRESPONDENCE.—Owing to difficulties which have arisen in consequence of correspondence being imperfectly addressed, an order has been issued by the United States postal authorities requiring the addresses on letters etc., passing through the mails to places in the United States, to be very explicit so as guard against their being misent. For instance, it is no longer sufficient to place the street and number and words "New York City" in the envelope of a letter intended for a person in that great centre, but a superscription must read thus, for example: David Copperfield, 138 Dickens St., New York City, N. Y.

The initials of the State or of the State in full must appear in all cases. Philadelphia or Louisville, simply will not do—and very properly—but it must be "Philadelphia, Pa." or "Louisville, Ky." if Missouri, or "Kentucky." TWEEDLEDUM AND TWEEDLEDIE.—The St. John Globe in asking merchants to advertise in the Montreal Advertiser, in a harmless playful manner, that if there were any Conservatives left in business they, especially, should aid the paper referred to, as its proprietor was one of themselves, whereupon the Sun said:—It strikes us that mortality has been as severe among "Liberals" in the last few days according to resolution Conservatives. It does not seem advisable to carry politics into business as the Globe seems bent on doing.

And yet Conservative papers have been giving the particulars of the business difficulties of one large concern in St. John and ignoring those of another later. The discrimination was probably as "thin" as the "readjustment" that was to be "no increase." By all means let "business be business." A MONTREAL DISPATCH OF 10th inst. says:—The Coroner's enquiry as to explosion of the Danville was continued this morning at the Morgue. The testimony principally that the pipe and boiler were defective; that the defectives were not properly tested; that the inspection of vessel was not what it should be. "That deceased came to his death by escape of steam; blamed the Steamboat Inspector and recommended that Government look more actively after both issuing of certificates and inspection of boilers. The jury showed astonishment at the verdict and they were not properly tested; that the inspection of vessel was not what it should be. "That deceased came to his death by escape of steam; blamed the Steamboat Inspector and recommended that Government look more actively after both issuing of certificates and inspection of boilers. The jury showed astonishment at the verdict and they were not properly tested; that the inspection of vessel was not what it should be.
