ST. JOHN STAR.

ST. JOHN, N. B., MAY 6, 1908.

CANADA NOT IN IT.

Canada, the United States, Japan, Spain and all other countries of the earth in which women are regarded as beautiful, may now sit down quietly and say nothing more. England has entered in the world's beauty contest, a young lady, compared with whom those chosen in other lands are—mildly—unattractive. This international beauty contest has been in progress for some months. A Chicago paper offered a valuable prize to the one who should be declared the most beautiful woman in the United States. The winner was Miss Margaret Frey, of Denver. The contest aroused interest elsewhere and has of late taken on an international aspect. Five countries have made selection of their competitors, and many others are to follow. Miss Frey represents the United States and has, according to her photograph, a face over which artists might rave. Canada, after long consideration, selected Miss Violet Hood, of Yarmouth, whose features, as portrayed in newspaper print, indicate striking individuality and something more than mere prettiness. Spain places confidence in Donna Petra Herce, of Logrono, a typical brunette, the beauty of whose face was the topic of the hour while the contest in that country was in progress. Sweden sends as her representative Miss Jane Lundstrom, of Stockholm. All these ladies deserve, according to their photographs, the high opinions expressed as to their beauty, but none of them will win the contest. England has discovered a face such as few could believe exists except in the artistic imagination. The name of this competitor is not announced, but this unknown will be the winner, and those other countries which have already entered may just as well gracefully retire. There will be no faces at all comparable to that of the English girl.

THE FEELING IN BRITAIN.

The following despatch is commended to the earnest attention of the misguided free trade globe. Presumably that paper will in the course of the next few weeks discover some local support—maybe a tax on cats—which might account for the change in Wolverhampton. Anything rather than tariff reform serves in the eye of the globe, as an excuse for government losses.

LONDON, May 5.—The declining popularity of the present government was again revealed by the result of the bye-election in Wolverhampton today to replace Sir Henry Fowler, who, as Viscount Wolverhampton, took his seat in the House of Lords. The Liberals retain the seat in the commons but by a bare majority of eight, as against a majority of 2,865 in 1906.

There seems no longer room for doubt that the country is being rapidly converted to Joseph Chamberlain's tariff reform policy. The campaign at Wolverhampton was fought almost entirely on this issue. This is admitted by the Liberal newspapers, who do not attempt to disguise the severity of the view the government has sustained.

CANADA'S INDUSTRIES.

A census of the manufacturing industries of the Dominion was recently taken and has been published at Ottawa. According to the returns there are a total of 15,796 industrial establishments in Canada, with an aggregate capital of \$846,585,023. These thousands of industries employ 862,539 persons. They pay \$165,100,011 in wages, and have an output valued at \$715,352,002. Ontario, of course, is away in the lead in the value of its industrial output, and has an aggregate investment of \$397,444,705. Quebec follows with \$255,479,662. Then there is a long drop to Nova Scotia, which is third on the list with \$76,048,191 for its investment credit. British Columbia and Manitoba both come ahead of New Brunswick while Alberta, Saskatchewan and Prince Edward Island make smaller showings. From the year 1900 the aggregate capital engaged in industries employing five or more persons increased by over 88 per cent—from \$446,916,487 in 1900 to \$833,516,135 in 1906. Since the previous census a number of new industries have appeared, among them being aluminium ware, which now has three establishments, a capital value of \$745,510 and a product of \$816,993. Asbestos is to the front with twelve establishments, a capital of \$5,621,682, and products valued at \$1,532,619. Cement blocks and tiles now have twenty-six establishments, a capital of \$20,975 and products valued at \$407,687. In establishments having five or more employees the total number employed for 1906 was 862,539, as against 339,172 in 1900, an increase of 44.74.

Salaries and wages paid to these employees amounted in 1900 to \$112,240,760, and in the census year to \$162,100,011.

573, an increase of \$48,860,253. The proportion of female to male workers was 18.59 per cent, but varies in the different provinces from 1 to 3.39 in Quebec.

MARCH WINDS.

Behold, the beauty doctors
At last are come to town,
And they will make your eyes to shine
Without a penny down—
And O, the roses, mids, they bring,
Without a penny down.

Then seek these rosy doctors,
Dull eye and pallid cheek!
Go seek them in the woodland,
And on the mountains seek!
Their hands are rough but wondrous,
Their triumphs are unique.

FOR MODERN HEALTH.

"In aqua sanitas," quoted the modern observer. "Now, there's an axiom that needs to be revised."
"What's the idea?" enquired the plain citizen.
"Well, to be correct, it should read: 'In boiled aqua sanitas.'"

A WEIGHTY REASON.

That Taft may very soon be cast
A heavy part to play,
Need not be wondered at since he
Has such a winning weight!

SEVERED HER RIGHT.

A certain young lad in East Lyn
Tried writing like Elmer Glyn:
After taking one look
Miss Violet Hood, of Yarmouth,
And Popper he spanked her like syn.
His nose, which fully cured him. He is now stronger and better than he ever was and neither study nor work about the farm seem to fatten him. I believe Dr. Williams' Pink Pills saved him from a life of misery.

WHEN TOMMY BATHES.

"You must keep your mouth shut when you're in the water," said the doctor, as she gave little Tommy a bath. "If you don't, you'll swallow some of it."
"Well, what of it?" demanded Tommy. "There's plenty more in the pipes, ain't there?"

FATHER'S NARROW ESCAPE.

A mother whose little boy always suffers from colds found it necessary to take him with her while shopping the other day, and as the distance was rather far to walk, she decided to risk taking him on the car. All huddled up in a corner he sat and his face kept growing paler and paler, while all the while his eyes seemed fastened with a hard, glassy stare on the car wall opposite him.
"I think we'd better get off for a little while," said his mother, watching him.
Out in the air the little fellow felt better, and with his voice quivering from earnestness he said:
"You know, did you see that sign in the car? The one that said five hundred dollars fine if you spit on the floor. Well, you think you think it would have cost my poor papa if I had vomited!"

DOLLAR TIP KILLS A
SURPRISED WAITER

Drops Dead on Woman's Lap at First
Display of Generosity.

NEW YORK, May 5.—When "Bill" Jenkins received a \$1 tip yesterday at Menden's Hotel, he dropped dead. Bill was one of the most popular waiters in the Coney Island section.
"How's pickin' today, Bill?" asked one of Jenkins' fellow-waiters.
"Pretty punk, pal," chirped Bill. Just then a prosperous looking pair entered the dining room, and took a seat at one of the tables.
"What can we get to eat here?" asked the man, running down the score-card.
"Best in the market," said Bill, blithely. "Planked steak and fixings, ain't half bad," he said.
"That listens good to me," answered the man.
When the pair finished the meal, Bill paid the check from a \$10 bill and returned with the change.
"This is your share," said the man, shoving it toward him.
"Thanks," gasped Bill, tottling to the floor, his head falling in the woman's lap.

POLITICS IN TRANSVAAL

Movement on Foot to Increase Use of Dutch Language.

JOHANNESBURG, May 5.—The annual Het Volk Congress, which has been in session at Pretoria, has not produced any startling political developments. General Botha opened the Congress in an almost colorless speech in which the most interesting passage was a complaint that "Sir Percy FitzPatrick and others were trying to set the people of the towns against those of the country districts." This is a significant variation of the old charge of setting race against race, and shows that the appeal of the Progressives to the farmers in schools and in departmental correspondence, while a very large number demanded permission for the farmers to distill and sell spirits. Education and liquor are evidently burning questions in the Transvaal countryside.

WEAK KIDNEYS

Restored to Strength by Dr. Williams' Pink Pills

Bad blood is the cause of weak kidneys. The impurities of the blood clog the kidneys so that they are unable to perform their work of separating the waste matter from the blood—the bid from good. The symptoms of diseased kidneys are numerous. The dull, sunken eye, the coated tongue, yellow, swollen face, all show what is wrong. This disease must not be neglected. Every day delayed in finding a cure is a day nearer "Bright's Disease"—that trouble is incurable. Do not waste time and money on a medicine which acts only on the kidneys. It may relieve, but it cannot cure you. The trouble to be permanently cured must be treated through the blood. Thousands owe good health—some life itself—to this medicine. Among them is Roy Davison, a man who resides with his uncle, Mr. C. B. Maclean, near Brockville, Ont. Mr. Maclean says: "My nephew, Roy, had weak kidneys. About a year ago he took the measles and this left him in a bad state. His kidneys were so weak that they were unable to leave school. Our family doctor was unable to help him. In fact he told me that Roy might never get better; that the disease would probably grow worse. I then procured a supply of Dr. Williams' Pink Pills. I had already used the Pills myself with great benefit, and he took the measles and this left him in a bad state. His kidneys were so weak that they were unable to leave school. Our family doctor was unable to help him. In fact he told me that Roy might never get better; that the disease would probably grow worse. I then procured a supply of Dr. Williams' Pink Pills. I had already used the Pills myself with great benefit, and he took the measles and this left him in a bad state. His kidneys were so weak that they were unable to leave school. Our family doctor was unable to help him. In fact he told me that Roy might never get better; that the disease would probably grow worse. I then procured a supply of Dr. Williams' Pink Pills. I had already used the Pills myself with great benefit, and he took the measles and this left him in a bad state. His kidneys were so weak that they were unable to leave school. Our family doctor was unable to help him. In fact he told me that Roy might never get better; that the disease would probably grow worse. I then procured a supply of Dr. Williams' Pink Pills. I had already used the Pills myself with great benefit, and he took the measles and this left him in a bad state. His kidneys were so weak that they were unable to leave school. Our family doctor was unable to help him. In fact he told me that Roy might never get better; that the disease would probably grow worse. I then procured a supply of Dr. Williams' Pink Pills. I had already used the Pills myself with great benefit, and he took the measles and this left him in a bad state. His kidneys were so weak that they were unable to leave school.
