

of comink. The mixture should be kept well stirred during the preparation, and should be applied as soon as made. This particular method has been tried in many cases in Germany, and, according to the Journal quoted from, it satisfactory results have caused its adoption upon a scale of progressive importance.

SWISS FOREST PRESERVATION.

Rev. Dr. Wheeler, of the Methodist, writes from Chamouni:—The Swiss land is mostly economized. The mountain side that is nearly perpendicular in not a large acreage; the mountain side that is very steep and yet will, with the help of roots, hold soil, is valuable for the growth of wood. Hemlock and beech are the chief forest trees; and the cultivation and preservation of forest land is vigorously regulated by law. If an owner clears a piece of timber land he must replant it. In some cantons he cannot cut a tree without a permit. The sound practice prevails of clearing small plots at once—not cutting a few trees here and there through a wood as with us. A small plot is cleared, the stumps and brush entirely removed (every twig of the branches being saved for wood), and then the space is replanted (usually from nurseries) and the new trees cultivated, trimmed out or thinned as they may require. In this way Switzerland, using much timber (its rural and village buildings being chiefly wooden), and having no coal beds for its fuel, keeps up an abundant supply of timber and wood on the strictest principles of economy. The Swiss Alps are covered with wood; and the immense timbers which the traveller sees by the wayside are all the fruit of cultivation on a good system regulated by law. We Americans will have to learn in this matter of the Swiss and Germans. The native forests which we have been squandering for a hundred years will hardly last into the next century. Already I see that a convention has been held in the west to devise plans for preserving the remnants of our great woods. We shall have to come down to system and regulation—and produce our wood and timber as methodically as we "make" corn and pork. I ought not to pass over the economy of the land, which is shown in the absence of fences—which have taken so much money from the pocket of the American farmer—and the cultivation of every corner; or the excellence of the macadamized roads, which are also economically narrow. The woodgrown sides of our rural highways will by-and-by disappear, and three of the four rods of their width will be taken into the bordering fields. After we have made these little economies and learned the arts of irrigation and timber culture, the greatest country in the world will be still more worthy of our patriotic devotion.

NORFOLK (VA.) VIRGINIAN.

Yes, sir, it is all that it is claimed to be. I have tried it, and have advised and witnessed its trial on others. I tell you its effects are simply wonderful. It gives a cure, and without much trouble at that. I had been suffering a great deal for over a month with very severe pains, contracted from a cold. I first experienced the pain in my side, and from its peculiar nature, I thought that it might be the premonition of paralysis. My friends were fearful, but after it shifted about, from one side to the other, from arm to leg, shooting through my body in a most infernally torturing manner, I knew that it was rheumatism that had me, and I sought remedies of different kinds, without effect, until I chanced to see the advertisement of St. Jacobs Oil, and read of its wonderful cures, when I resolved to give it a trial. That was about two months ago, and I had then been suffering a month of considerable agony. Securing a bottle of the oil, I applied it to the parts affected, and that night I had the first good night's rest that I had since the commencement of my attack. I gave two other applications, and became perfectly cured, not suffering from rheumatism since and that has been two months ago.

This was the story of his cure by St. Jacobs Oil as told by Capt. Jack McLean, who for fifty years has been a resident of Norfolk and Portsmouth, and who is as well known in Norfolk and Portsmouth as almost any of its citizens. It was in reply to some questions put to him by

our reporter, who had heard of his remarkable cure, as well as of others that through Mr. McLean's instrumentality, had been brought about by the use of St. Jacobs Oil. After he had told the story of his own case, we asked him about the others, and he did not hesitate to relate them.

One was the case of a druggist from Warren, North Carolina, who, while on a business trip to Norfolk, during the recent snowy and sleety spell, had the misfortune to fall on the ice and bruised himself very severely, so much so that he was confined to his room at his hotel. Mr. McLean happened to visit the hotel when he heard of the accident, and having formed the acquaintance of the gentleman injured, advised him to give St. Jacobs Oil a trial. The druggist, consenting, Mr. McLean brought him some of his oil, which he applied, with such a happy result, that he was enabled to go on his way home rejoicing. Another case, was that of Mr. Walter Howard, a well known fish and oyster dealer in our city. Mr. Howard had also during the recent sleety spell fallen and injured himself. Being intimate with Mr. Howard, Mr. McLean says he sought him, and finding what his injuries were, he recommended the use of the oil. The result as in the previous case was a cure—and a thorough cure. Mr. Howard is now a firm believer in the curative properties of St. Jacobs Oil.

But a more remarkable cure than all of the rest—and which our reporter had heard of before having any knowledge of Mr. McLean's connection with the case—was that of a venerable lady about seventy years of age, who, some two weeks ago, while seated at the supper table, was stricken with paralysis, the whole of her left side being afflicted. Her speech was even affected. The family physician was sent for, and he at once prescribed the usual remedies, but without effect. The old lady was a family connection of the wife of Mr. McLean, and Mrs. McLean on hearing of her affliction visited the house, and learning that no relief had been secured from the physician's remedy, recommended the use of St. Jacobs Oil, relating its effect upon her husband. The oil was procured and applied. The afflicted side was well rubbed and partial feeling was restored. The second day after the first application the afflicted lady was able to sit up, and the third day she was well enough to sew. Since then she goes about the house apparently as well as she ever was, and she considers that she owes her life to the great curative virtues contained in St. Jacobs Oil. These statements of cures coming to our notice from our interview with Mr. McLean, brought to our recollection a statement made to us by Prof. G. B. Cromwell, who last February exhibited in our city his beautiful "Art Illustrations" at the Opera House, which each night attracted crowded and cultivated audiences. It was in connection with his recommendation to a gentleman who was suffering a great deal from rheumatism, and who on that account had been unable to attend the exhibitions. Prof. Cromwell advised him to try St. Jacobs Oil—even urged him to do so—and at last bought him a bottle of the oil, that he might have no excuse for not using. The gentleman, however, was then under the treatment of his physician, and did not use the oil. In explanation of the desire on his part why the oil should be used, Prof. Cromwell stated that he had some year or so before suffered excruciating torments from rheumatism, and that he had tried all kinds of medicines and so-called cures—all without effect. He heard, however, of St. Jacobs Oil, and resolved to give it a trial, which he did, and he stated that its effect on him was almost magical. A complete cure was effected, and since then he had never suffered from rheumatism. But in order that he might be at all times prepared for the enemy, he never travelled without carrying in his trunk a bottle or so of St. Jacobs Oil.

While the above facts relate to the very remarkable curative properties of this Great German Remedy, it appears, judging from what our druggists say, that the belief in its virtues is wonderfully strong among the people of all classes, and that they secure it as a sure relief in pain. No patent medicine, it is asserted, has ever had the sale that St. Jacobs Oil has had. No doubt much of this has been due to

the extensive use of printer's ink, in the way of advertisements, almanacs, posters, sign bills, cards, puzzles, and everything in the printing line. But the many and many of certified cures and the interest which they have excited has had a vast deal to do with its popularity. It is sought by all, and is a boon to our druggists. Yesterday we detailed a reporter to visit the different drug establishments and to learn from them some facts regarding the sale of the oil. He visited, among others, the house of Walke & Williams and saw Dr. Walke, who informed him that the demand for the oil was simply wonderful. He stated that it had exceeded the demand for any patent medicine he had ever handled, and this was saying a great deal, as Dr. Walke has been engaged in the drug business for many years, and the business of his house is very great. He next called on the old and well-known drug house of M. A. & C. A. Santos. The senior of the house was not in, but his son was approached, and he said in reply to the inquiry of our reporter, that the sale of St. Jacobs Oil was tremendous—never anything like it. He next visited the extensive establishment of J. W. Burrow, and finding that gentleman present, asked him: How about the sale of St. Jacobs? His reply was: "Splendid; the demand is very great. I make large sales of the oil." The drug store of Dr. H. R. Vaughan was next sought, and in answer to our reporter's interrogatory, Dr. Vaughan readily answered: "My sales have been remarkable. The oil goes fast."

We only conclude after the above statements of cures and sales, that there is a great deal in St. Jacobs Oil—and that where the benedictions have been so great, the Messrs. Vogeler & Co. may well be classed as benefactors—deserving the blessings of the multitude who have been cured.

Non-Inflammability of Redwood.

A quality of California redwood is fire-ready absorption of water when heated, which for a time makes it almost fire proof. The San Francisco Call says that the quickness with which fires are extinguished in that city has often been remarked, and the celerity with which blazing buildings are often transformed into charred remnants is greatly facilitated by the entire lack of the resinous element in the redwood lumber. Resin, familiarly known as "pitch," is not only highly inflammable, but is insoluble in water and will burn while being drenched with the element, with which it will not mix. At a recent fire in that city the advantage of redwood over other lumber in the construction of buildings became apparent. The moment water struck the side of the building or roof timbers it not only quenched the flames but the wood absorbed water as a sponge would, and it became incombustible.

MALTOPEPSYN

Artificial Gastric Juice.

A WONDERFUL FACT, proving the remarkable digestive power of Maltopepsyn. Two doses (30 grains), of Maltopepsyn will digest the entire white of a hard boiled egg in a bottle of water in 3 to 4 hours. How much more will it digest in the stomach assisted by that organ? About twenty times the quantity.

Get from your druggist ten drops of Hydrochloric Acid in a four ounce bottle. Fill a tumbler half full of tepid water (distilled water is best, though soft water will do), then add the finely cut white of a hard boiled egg, then add two doses (30 grains) of Maltopepsyn and shake bottle thoroughly every 15 or 20 minutes, keep the bottle warm, as near the temperature of the body (100° Fahrenheit) as possible, and in 3 to 4 hours the egg will be entirely dissolved or digested.

Maltopepsyn is endorsed by the leading Physicians and Chemists throughout the Dominion of Canada.

Send for Pamphlet, 24 pages, giving full treatment of Dyspepsia with the Rules of Diet, etc., mailed free upon application by HAZEN MORSE, TORONTO. Price per bottle, with dose measure attached, 50 cents, contains 48 doses or about one cent per dose.

TREE CULTURE.

French authorities have awakened to the advantages of tree culture and have ordered that trees should be planted on barren spots belonging to the government. The reason assigned is the growing scarcity of timber in France. Here is one more good example to which those interested in the timber protection and culture movement can point with pride. It is further reported that tree planting is prospering in smoky London, and in Tooley street—which is described as a metropolitan ravine, a sort of abyss in brickwork, where anything that savored of green fields and pathless woods would appear impossible—a thoroughfare in the unsavory neighborhood called Bermondsey, it is reported that of eighty-four trees there planted only twelve have died, while the remainder are flourishing. This leads the Standard to reflect how much better it would be to employ the charms of nature to relieve the ugliness of the town than to put up statutes at which everyone shudders. There is a good deal of sound sense there. —The Lumber World.

ARRIVED AT QUEBEC.

The Chronicle gives the following list of rafts, etc., arrived at Quebec:—

Oct 25—King Bros, deals, St. Lawrence Docks.
D D Calvin (2), oak, pine, &c., sundry coves.
Collins Bay Co, oak, &c, Bridgewater cove.
Flatt & Bradley, staves, sundry coves.
S M' Rao & Co, do, do.
A Gilmour & Co, deals, do.
G Samson, deals, Indian Cove west.
Oct 26—Flatt & Bradley, staves, sundry coves.
Larkin, pine, etc, Dobell's cove.
Oct 30—J & B Grier, hemlock, &c, Russell's Dock, Levis.
British Canadian Lumber & Timber Company, white and red pine, St Michael's cove.
Nov 2—Simon Wigle, staves, Woodfield Harbour.
Sundry Lots, staves Union Cove.
Guy Bevan & Co, deals, Hadlow Cove.

17 YEARS' EXPERIENCE.

HOWIE'S DETECTIVE AGENCY

OFFICES, 32 KING STREET EAST, TORONTO, ONT.
All legitimate Detective business attended to for Banks, Fire and Life Insurance Co's, also for private parties. This agency does not operate for reward. 1915

LUMBER

Shingles, Doors, Sash, Flooring, &c., WANTED,

STATE QUANTITIES AND PRICE TO SHORE & DAVIS,
Head Office, 514 Maine Street, Winnipeg, Man.

A CURE GUARANTEED.

MAACK'S MAGNETIC MEDICINE.
Brain and Nerve Food

For Old and Young, Male and Female. Positively cures Nervousness in all its stages, Weak Memory, Loss of Brain Power, Sexual Prostration, Night Sweats, Syphilis, Gonorrhea, Seminal Weakness, and General Loss of Power. It repairs Nervous Waste, Rejuvenates the Jaded Intellect, Strengthens the Enfeebled Brain and Restores Surprising Tone and Vigor to the Exhausted Generative Organs in either Sex. With each order for TWELVE packages, accompanied with five dollars, we will send our Written Guarantee to refund the money if the treatment does not effect a cure. It is the Cheapest and Best Medicine in the Market. Full particulars in our pamphlet, which we desire to mail free to any address.

Maack's Magnetic Medicine is sold by Druggists at 50 cts. per box, or 6 boxes for \$2.50, or will be mailed free of postage, on receipt of the money, by addressing MAACK'S MAGNETIC MEDICINE CO., Windsor, Ont., Sold by all Druggists in Canada. 123
