PLANETS IN JULY.—The Sun is in Apogee—farthest from the Earth—on July 3rd, at 6 in the evening, Montreal time. The crescent of the waning Moon is near Mars on the 9th, and Saturn on the 11th. After becoming "New," Luna will pass South of Venus on the evening of the 13th, and pay her court to Jupiter the following evening. Mercury is very near Venus on the night of the 17th. Mercury is in conjunction with a *Leonis*, (Regulus) on the night of the 25th.
