MONTREAL JULY 20, 1914. **Business** Prospects in

the United States

nic condition of the grea The econ confidently look forward to a reviv-Republic to the South is of more than al of business shuch as Canada has United States would probably, in the of linkry interest to the people of this For three thousand miles tory. The slowing down in our ec. can manufacturers formidable in Eucountry. our frontier marches side by side with that of the United States, porary. Our resources are vast, our highest protection which those indus-cographically, and according to all people aggressive and progressive and tries enjoyed in the halcyon days of alists of Europe and especially of the and Canada were destined to form an unit; and notwithstanding United Kingdom, we may confidently all that has been done by the two look for an area of prosperity which nations on this vast continent to restrain and hamper trade between them, this nation's march forward. the fact remains that the United States

States

the injustice done to their business by

finds in Canada its second greate customer, while in turn Canada has in the Republic its greatest market after Industry in the United that furnished by the United Kingdom. Gradually, however, we may expect that economic barriers betw the two peoples will be brushed aside. When that day dawns, there will be

an enormous impetus given to the in the United States, but particularly the end model in the context of the intervention and woollen goods. For then and of the United States.

trade"and comments tion and of the United States. For the last two years, business in the United States, as well as in Car-ada, has been in a state of doubt and hesitation rather than one of depres-tion. Is the topinine, for thas been made by various that the tertile industries of the United pecially of English and Gammar com-petition. The deductions which they were that the lowering of the tariff mar the tertile. The deductions which they were that the lowering of the tariff mar they industries in been any crisis of panie due to over pering of gestaving and gestaving and gestaving com-production, over trading and the verse pering of gestaving and ges

ments to the changes, nowever bener ficial the final result might be. The new tariff has been in effect the better particity are bener and no doubt come industries have suffered in the readjustment which they have had to undergo. The new bapking system little das been done to disturb the banking of the country. Legislation for the regulation and restraint of large scale business is still pending. It should not be overlooked, either, tion holds, the white races rule over for the regulation and restraint of It is difficult just at the present, to now what the effect of this legislathow what the effect of the second in the average rate of wages is not as population of 1,100,000,000. Is it any wonder the Yellow Peril has arisen? tion will be, but there is a growing hope that official requirements will be such as can be complied with without cerious difficulty and with possible bonefit. Meanwhile, in spite of all sumshine arguments and pleas to cheer up, but the facts and figures in the case to sumshine arguments and pleas to cheer up, but the facts and figures in the case to sumshine arguments and pleas to cheer up, but the facts and figures in the case to discover, if, we can, whether American manufacturers are making a fair re-port upon the state of the cotton in-dustry in the Republic.

s have not been able to adjust mites to the needs of their fraf-ne credit, without the permission with 441,157 bales in June, 1913. The at Commission has too long eration were 30,538,752, or about 900,number of cotton spindles in full op-eration were 30.538.752 or chour and kanesburgh Illuminator. that Commission has too tone eration were so, so, or the same time last year. It should not be overlooked, either, that in the New England cotton mills, ligh as that paid by our Canadian wonder the Yellow Péril has arisen? with special knowledge a business life, but the with special back of the four verse of a business life, but the four verse of mental oroadening do figure as an as set in the sum total of his qualifications as a general guarantee of hi intelligence and ability to learn, pro 

## "SKY-HIGH" MEAT PRICES

You can give us which your work is to be done. You can give us which we writh on the technical, the local and the municipal side. You can give us the framework into which the ideal conditions, when discovered, are to be fitted. As to the answer to the question which I have propounded, there is in my own mind no doubt that it is impossible to give any single answer to the question. No one theory explains the fact. It is a composite answer. So far as the physical questions involved are concerned, it is beyond a 'doubt that until latey the There are indications that the pr of meat will surpass the record of meat will surpass according to

There are indications that the prices of meak will surpass the record high marks of secent years, according to the presentatives of many of the great packing plants of America. The pre-sent tendency of the market appears to bear out this prophecy. The cattle needed for the ample beef supply of other years are not on the ranges and the farms of this or any other country. There is a meat short-age bul it is a world shortage. The stional experts show that the cattle swept from the ranges by the settle-ment of the old grazing States have not been replaced. The farmers who hold the old grazing Inda are crop growers and not growers of live stock, and the passing of the ranges ment the passing of cheap and plentiful beef. In brief, beef and meats are rising in price for the same reason that dia-mends are valuable-because of the comparative scarcity of the commodity. We may get some relief from the beef. and a doubt that until lately with of congested districts foll he growth of slums and the gabits of people f. r generations liging in estrable "circumstance", here here The speed limit. Sort of maxing the quick and the dead.
