l even in an artifical

erstand of all that e some ruling force ng it all. There is out it. It does not ar and another the ntury after century, he ruler and guide is ower than man and nce.

The Name behind

Dependable Spark Plugs

For years we have been building a reputation for the dependability of Champion Spark Plugs. To-day "Champion" on the insulator of a spark plug is the world's synonym for dependability.

Champion dependability is based on thousands of experiments and tests, resulting in our famous "3450" insulator, which, because of its indestructible quality, gives exceptionally efficient service in all types of gasoline motors and engines:

No matter what makes of motor you own, there is a "Champion" that will give efficient service under any condition the motor itself will stand.

Look for "Champion" on the insulator as well as on the box.

Sold where motor goads are sold

Champion Spark Plug Co. of Canada, Limited Windser, Ontario

The Largest Factory in Canada making Spark Plugs exclusively

Specially recommended for use in Overland Cars

Over-strength in every part

It pays to buy sturdy, rugged as efficient machines, they threshing machinery For it have the strength that stands has to stand treatment that ordinary machinery never geta.

The bumping about over rough roads, up hills and down, puts a terrible strain on these heavy machines. If there are weak parts, poor material, defective ship, they are bound to break and cause trouble and expense.

It was because White Threshing Machinery had sturdiness and extra strength in every part built into them that they hold such high reputation to-

Aside from their practical simplicity and ease of operation up under strain. Parts that have to meet extra load and strain are made with great over-strength. It has been the one thing we specialized on for years, the building of threshing machinery, and every feature of proven merit is to be found in "The First Quality Line"

The better you understand machinery the more you will admire the White Tractors and Threshers. We want you to examine our machines carefully, compare them point by point with others, and then decide absolutely on the merits of the machines. You are bound to choose "The First Quality Line."

Full information and illustrated catalogue will be sent on request
