

MARTIN
AMBER

WHEAT

MARTIN AMBER WHEAT.—The hardest and most productive Winter Wheat grown in Canada (imported by us two years ago), and has proved by many tests to be the best variety grown in Canada to-day. Our customers who purchased it last season proclaim it the best wheat on their farms. It has a fine straw, stands up well, and is free from rust and midge. Has a long, bald head, white chaff, closely set, and amber grain. Requires only one bushel per acre on account of its great stooling qualities, and yields from 30 to 45 bushels per acre. Every farmer should secure Martin Amber Wheat at once. It will pay you. Order early—stock limited. Price, first quality of seed, \$4 per bushel.

HYBRID MEDITERRANEAN.—Also a new variety, and has done well the past season. The head is remarkably thick set, as close as Deihl, and bearded like the Mediterranean. Has stood the winter well with us, and is worthy of trial. Price, first quality of seed, \$3 per bushel.

DEMOCRAT.—Introduced by us five years ago and has done well. Is hardy and a sure cropper. A white chaff bearded variety, free from rust and midge. Will be largely sown this fall. Price, first quality of seed, \$1.30 per bushel; ten bushel lots, \$1.25 per bushel.

Best two bushel Cotton Bags twenty-five cents each. Samples on application. Also on hand a fine stock of Landreth or Bonnell, Egyptian, Scott, Clawson, &c. Also we have on hand a fine stock of Orchard Grass, Kentucky Blue Grass, Meadow Fescue Grass, Eye Grass, Red Top, &c., for fall seeding for permanent pastures.

Please send for our Fall Wheat and Grass Catalogue, free to all applicants. Correspondence invited. Address

I X L FEED MILLS. The cheapest, most durable and perfect iron feed mill ever invented.

ONTARIO PUMP Co.,

Gentlemen,—In regard to the 16-foot geared Wind Mill I bought of you, I can say it more than fills my expectations in every respect. In a fair to good wind I can saw wood at the rate of four cords of hard wood per hour, cut once in two. In a stiff wind I open the fans just half way and get all the power I require. In regard to your feed mill it is just grand. I have ground peas and oats at the rate of a bushel in three and a half minutes, and ground it as fine as one would wish for. I can grind fine cornmeal, also Graham flour. Have ground, since the 15th of February, 325 bushels of grain for customers, besides doing my own work with it. One man brought a grist of screenings, such as small wheat, mustard, and pussy grass seed, thinking that I could not grind it; but I ground it to powder, looking just like ground pepper. Your 13-foot geared mill, I think, is quite large enough for any farmer to do his own work.

Yours truly, EDWIN KEELER, Maitland P. O.
