DEPARTMENT OF THE NAVAL SERVICE

ROYAL NAVAL COLLEGE OF CANADA

The Royal Naval College is established for the purpose of imparting a complete education in Naval Science.

Graduates are qualified to enter the Imperial or Canadian Services as Midshipmen. A Naval career is not compulsory however. For those who do not wish to enter the Navy the course provides a thorough grounding in Applied Science and is accepted as qualifying for entry as second year students in Canadian Universities.

The scheme of education aims at developing discipline with ability to obey and take charge, a high sense of honour, both physical and mental, a good grounding in Science, Engineering, Mathematics, Navigation, History and Modern Languages, as a basis for general development or further specialization.

Candidates must be between their fourteenth and sixteenth birthdays on July 1st following the examination.

Particulars of entry may be obtained on application to the Department of the Naval Service, Ottawa.

G. J. DESBARATS,
Deputy Minister of the Naval Service.
Ottawa, January 8, 1918.

Canada in the Moving Pictures

Continued from Page 7

That paragraph cannot be much improved on by the movie people. But it doesn't for one moment serve to describe the picture. The man who took it was not only an artist, but a very intrepid climber. He has woven the whole thing into a camping story, but he never misses a single one of the beauty spots in the whole thing. Mount Assiniboine, only twice scaled, is shown from the serene safety of camp down below. It is shown later with men hanging to its dangerous, sheer and crumbling rock sides hundreds of feet above nothing. How the men got there with nothing but an alpin-stock to impede their movements is hard enough to understand. But how the fellow, with a 30-pound movie camera to lug along, ever managed is a miracle. He is the only one not shown in the picture, naturally, but they ought to have got him in somehow.

Knowing Ourselves

It is the purpose of the department this summer to depict the newest of Canadian industries—ship-building, and a man is on that job now. Another camera has been sent out to take a film of the B.C. salmon fishing. Still

others are engaged from time to time in the preparation of pictures depicting Canadian sports. In fact the purpose of the department ultimately is to be able to throw on the screen the whole romance of Canadian life, and Canadian industry, and Canadian institutions. "Know thyself" is the moral of the work, and after that let other people know you.

Composite pictures containing portions of all pictures have also been prepared. Eight of these composite pictures, which are prepared from the more popular viewpoint, and which educate without the patrons of the theatre knowing they are being educated, have been shown by film exchanges throughout the whole of the United States since last October. They are proving an exceedingly popular feature of the programs.

Meanwhile, under other auspices, the deeds of Canada's warriors overseas are being immortalized on the film. In the years to come the next generation will be able to witness in all its entirety that great film entitled: "The Rise and Life of a Nation."

Ice Wall, Athabasca Glacier.

A Canadian Advance

Vivid Description of a Night at the Front

THERE have been no better despatches written from the front than those which the well-known Western Canadian newspaperman, J. F. B. Livesay, has been sending during the past couple of months. Mr. Livesay, who is the Western manager of the Canadian Press, which handles the telegraphic news for all the newspapers of the Dominion, has his office in Winnipeg. He has had charge of the Winnipeg office of the Canadian Press for several years. Ever since the beginning of the war he has been keen to get to the front as a correspondent; but not until a couple of months ago was his desire realized. He was fortunate in getting to the front just before the beginning of the great Allied offensive.

In addition to his cabled despatches, he sends by mail more full descriptions of the operations at the front. One of

the best of his recent mailed despatches is the following vivid description of the advance of the Canadian army into battle:—

A Clear and Starry Night

With the Canadian Forces, Aug. 12. —(By mail, from J. F. B. Livesay, overseas correspondent of the Canadian Press.)—Wednesday night last was clear and starry, with light just sufficient to illuminate the white roadway and silhouette the regulated avenues of trees inseparable from a French highway of the first class. Against the eastern horizon was the usual pyrotechnic of trench warfare.

Far above is the noise of our aircraft. The enemy is not over this night of nights, or the curious scene beneath could hardly have escaped his attention. The white roads are chequered with moving masses of black. Canada is on

the march. The passing one by one, traction guns, ammunition, Red Cross ambulances, pungent odor.

The Every life. They march. The passing one by one, traction guns, ammunition, Red Cross ambulances, pungent odor.

"Zero" pointer has when behind the line, and a ten miles. At the same time the booming dull roar of roll of field shells which in front, far as the hell of the charge, a mighty battle has fiery fury which shows call of the lery supply.

For a the ear. The eye is spectacle across the uous shell lessly over. Our m walking ward, the clear the of horse gun batt on the perfectly without raise th ahead o to victo blotting us many.

The a and ov enemy's of his t ing th crews curious all this cannot within for cou and ou less, e guns. beyond had pi safest.

Lon ing of and t miles tanks petrol ing al can count.
