"Hunchback" Sets Appeal to Tourists

LAST SHOWING TO-NIGHT.

One of the most unusual requests ever received by a motion picture company is contained in a letter which reached officials of the Universal Pictures Corporation from the Academy of French Artists and Authors. The distinguished body expressed the hope that the massive settings used in "The Hunchback of Notre Dame" be kept intact for at least six months to permit of a pilgrimage by members of the society and other students of the Victor Hugo and Louis XI period.

Photographs of the settings used in the production were sent to the International Congress of Motion Picture Arts in Paris some months ago and attracted great attention. In an address before the Congress M. Valentine Mendeletam said:

"While touring America I visited 'Universal City' where Victor Hugo's masterpiece was in the final stages of filming. You would be astonished at the faithfulness with which the streets of Paris during the reign of Louis XI have been reproduced, but most of all by the remarkable reproduction of our beloved Cathedral of Notre Dame. I had the privilege of

seeing some of the finished film, and I feel safe in predicting that it marks the beginning of a new era in the art of the cinema.

"I have been keenly desirous of bringing Hugo unspooled to the screen, because I have always loved him. I have always loved Paris, loved France, and, to me these were Hugo. He was their genius, he was their god. During the many years I lived in your wonderful city, I was, so to speak, a neighbor of Victor Hugo. He was dead, but his spirit lived. And his home was there—now a public museum—right around the corner. I have brooded there for hours; communed with him in secret; learned of his great aspirations and found consolation and inspiration in his silent companionship. He was always with me when I walked near Notre Dame."

Peace in Mining Circles for 12 Months

The signing of the new National Wages Agreement between the British coal miners and the coal owners, it is expected, will insure peace in the industry for the next twelve months, according to advices received by the Bankers Trust Company of New York through its English Information Service. The agreement imposes upon coal owners extra cost which in the present state of trade constitutes a serious handicap. Already mines have been closed with the result that several thousand workmen are idle. The general tendency seems to be for owners to cease operations in unremunerative workings. In one or two cases where collieries have been closed, the owners have stipulated that a condition of their reopening is double shift working. To this system the miners are strongly opposed. Therefore, the question may become a serious point at issue between employers and employees.

Quiet conditions prevail in the coal trade both in Great Britain and in Scotland. Shipments from Newcastle for the first five months aggregated 5,583,000 tons as compared with 8,789,000 tons in the corresponding period of 1923, a decrease of 2.4% but, as compared with 1913 when the output was 8,240,000 tons, an increase of 1.1%. Shipments to Germany decreased and also shipments to Scandinavia and the United States. On the other hand, shipments to Holland, Italy, Spain, Canada and the Argentine, as well as Australia, somewhat increased. The bunkering trade, which is the supplying of ships with coal, showed a substantial improvement. In the first five months of 1923, 221 vessels were supplied with coal, having 74 registered tonnage of 345,384 tons. In 1924, 316 vessels were bunkered, having a tonnage of 508,324 tons.

The total output for the first half of this year from the coal mines of Great Britain was 139,061,000 tons, comparing with 140,791,000 tons for the first half of 1923 and 119,754,000 for the first half of 1922.

(From Our Own Correspondent.)

COMMISSION TO ENQUIRE INTO SCHOOL MATTERS.

Hon. L. A. Tachereau, Prime Minister of the Province of Quebec, has appointed a special commission, consisting of Catholic, Protestant and Jewish representatives, in equal numbers, to study school matters. The Catholic representatives are, Sir Louis-Philippe, M.P., former Premier of the Province; Alma Geoghegan, K.C., one of the leading lawyers of the Province with a wide knowledge of Constitutional Law, and Auguste Richard, a manufacturer. The Protestant members are, General Sir Arthur Currie, Principal of McGill University; E. V. Beatty, K.C., President of the Canadian Pacific Railway, and Chancellor of McGill University, and Walter Mitchell, former Provincial Treasurer.

For the Jewish community, the members are, Michael Hirsch, a prominent manufacturer; S. W. Cohen, an engineer, and Joseph Schubert, a member of the Montreal City Council. The purpose of the appointment of the commission is primarily to deal with educational matters on the Island of Montreal, which includes the City of Montreal, and suburban cities, and account for an approximate third of the total population of the Province of Quebec. In this area have arisen problems of unusual character concerning the education of children of diverse religious beliefs, hence the necessity of a complete survey of the situation and the desire to obtain suggestions from men who are closely identified with the groups affected, and men who are also interested in education.

By law, in the Province of Quebec, taxes on property for school purposes are paid into panels, Catholic and Protestant, according to their own belief of the property owner. Commercial corporations pay into a third panel called the Neutral Panel and into this third panel also are paid the taxes of Jewish property owners. Catholic and Protestant Commissions having obtained the sums paid into their respective panels are entitled to share the monies paid into the neutral panel upon a proportional basis according to population, with this exception that the Protestant Board is entitled to withdraw as a first charge the total amount required for the education of the Jewish children under their care. One of the suggestions offered was that a fourth panel, a Jewish panel, should be established, and this is one of the matters to be studied.

The most difficult matter for the Commission to settle will be that of the Verdun Protestant Schools which are financially embarrassed. No date has been set for the first meeting of the new commission.

KIWANIANS BUILD TUBERCULAR HUT.

The members of the Kiwanis Club have constructed a beautiful tubercular Hut at the Children's Memorial Hospital. The building was commenced last spring and nearly every member of the club put his shoulder to the wheel and helped in some way to construct the edifice, which is perfectly equipped as an outdoor convalescent home for underprivileged children. Nothing is lacking in the Architectural construction or equipment of the hut which was opened here lately.

TO ADVERTISE THE PROVINCE.

The immense possibilities of the Province, of Quebec from the tourist standpoint of view, that tourists should visit Montreal all the year round, and that hotels should be built in important towns and villages were the principal points emphasized by D. R. Mulligan, general manager of the Windsor Hotel, addressing the Kiwanis Club on the hotel position in Quebec. "The hotel business is the only one that gets the money from outside and spends it locally," he said. The public, he thought, should be particularly interested in the hotel business and hotels built wherever possible. He pleaded that a bureau of information should be set up and everything possible done to attract tourists summer and winter. Montreal had huge possibilities. It was within easy access of 15,000,000 people, and yet they had no active propaganda to bring these people here. The Provincial Government voted \$50,000 for the building of small hotels in the outlying important centres.

FIRE DID \$35,000 DAMAGE.

The inmates of St. Jean de Dieu Asylum for the Insane were aroused from their slumbers when a fire broke out in the bath near the hospital at 2.55 in the morning. The inmates and employees of the hospital saved the animals, but the hay was all destroyed. The fire smouldered for a day. The large barn was of modern construction and was just completed when the fire destroyed it. The damage amounted to \$35,000.

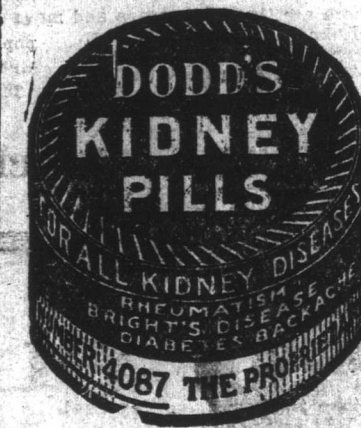

TWO MUCH SPEED ENDS IN DEATH

Constable Eugene Beaudoin, when riding his motor cycle, was killed when he collided with an automobile in St. Lawrence Boulevard. Witnesses at the Coroner's inquest testified that the dead man was going "like lightning," and at a rate from forty to

to miles an hour. It just took a second and death was instantaneous.

PECULIAR ACCIDENT ON SCENIC RIDE.

A very peculiar accident happened on the scenic railway at the King Edward Park, when a boy of ten years of age, residing at Point St. Charles, while riding with relatives and some friends, was choked to death by swallowing a cuff link which he had in his mouth. As the car took one of the steep drops the boy swallowed the link and choked. He was taken to the park office and given every attention, but when a doctor arrived the boy was dead.

The drunken auto driver is still found on our streets. Judge Enright sentenced a man to ten days in jail without the option of a fine for driving an automobile while under the influence of liquor. The policeman testified that the accused was driving on St. Urban Street, zig-zagging, on that thoroughfare. He said the man had caused a previous accident and had nearly run down a young boy. The judge gave the man a scathing lecture on such conduct, and ordered him to jail. The Boston Transcript, under the caption of "Alcohol and Auto Drivers," says: "Every driver of a car knows that in any given set of circumstances everyone concerned remains cool and collected, the chances of an accident are comparatively slight. The pedestrian who starts to cross the street in front of an approaching car becomes confused, turns back, and then attempts to hurry across. Result, he is hit. Two cars approaching a corner near it at the same time. One driver wavers, slows up, then speeds up to get ahead of the other car. Result, a collision. In each of these hypothetical cases calm judgment is destroyed through a momentary befuddlement. How much more dangerous, then, is the driver whose judgment is for a continuous stretch befuddled by liquor?" R. L. LOUIS CUDDEY.
