

AMMONOL

(Ammoniated—Phenylaceta

STIMULANT, ANTIPYRETIC, A.

Dose, 5 to 20 Grains.

Ammonol, like the majority of the more recently discovered the Amidobenzene series ($C_6H_5NH_2$). It differs essentially, however, from the other medicinal coal tar products, but especially in that active form and has a stimulating action on all the vital functions.

It occurs in amorphous crystals, having a pale yellowish color reaction, and has a pungent ammoniacal taste and odor.

Some Reasons Why Ammonol is Unique Among Coal-Tar

- I. It is Stimulating.
- II. It is a Stimulating Analgesic.
- III. It is a Stimulating Antipyretic.
- IV. It is a Stimulating Expectorant.
- V. It is a Stimulating Cholagogue.
- VI. It is a Stimulating Antispasmodic.
- VII. It is a Safe Remedy to use when other coal-tar derivatives are contra-indicated.
- VIII. Ammonol aids digestion, prevents hyperacidity of the stomach, prevents fermentation, prevents putrefaction, prevents the process of the p. asmodium of the algid and febrile diseases it is invaluable.
- IX. It is Anodyne and Anti-Spa
- X. It induces Sleep.
- XI. It is not a Secret Remedy.

Ammonol is put up in one-ounce bottles only. Reports on Ammonol from officers of the New York State Board of Health and other eminent physicians, together with samples sent free to any physician mentioning this publication.

NUTROLACTIS INCREASES THE FLOW AND IMPROVES THE QUALITY OF MOTHERS' MILK; STRENGTHENS AND NOURISHES NURSING MOTHERS.

During a discussion at the Academy of Medicine, New York, May 10, 1894, the Professor of Diseases of Children in Bellevue Medical College, Dr. J. Lewis Smith said that Nutrolactis had been found to decidedly increase the quantity of mothers' milk in two institutions with which he was connected. Similar testimonials have been received from 6,700 physicians. **THE NUTROLACTIS COMPANY, 36 East 14th St. (cor. University Place), New York.**

The Largest Manufacturer of Artificial Limbs in the World. And also the Largest Manufacturer of Artificial Arms in the World without any exceptions

MARCS' PATENT ARTIFICIAL LIMBS

WITH RUBBER HANDS AND FEET

Are natural in action, noiseless in motion, durable in construction and the most comfortable to wear

To A. A. MARCS:

DEAR SIR:—I was a professional tight rope walker and aeronaut before I lost my leg and I do not allow the loss of a leg to compel me to seek another occupation. With your patent artificial leg I can walk a tight rope nearly as well as I ever could. I feel safe and sure on my rubber foot, no matter where I place it. I consider your invention of the rubber foot the most valuable and important to persons who have lost their natural limbs.

Respectfully yours,

PROF. F. E. JACOBY,

Waterbury, Conn.

Over 16,000 in use, scattered in all parts of the world. Eminent surgeons and competent judges commend the Rubber Foot and Hand for their many advantages.

Received 24 Awards, including Highest Award, at the World's Columbian Exposition

Endorsed and purchased by the U. S. Government and many foreign governments.

A treatise containing 430 pages, with 300 illustrations sent free, also a formula for taking measurements, by which limbs can be made and sent to all parts of the world with fit guaranteed.

Address,

A. A. MARCS,

701 Broadway,

New York City.

Established 42 Years

NOTE.—The above cut was made from a photograph of Prof. Jacoby while performing on a tight rope. He is balancing entirely on his artificial leg, his natural foot is off the rope and is in the act of passing forward to take the next step.
