MILK COMMISSION

OF

The Montreal Medico-Chirurgical Society.

Montreal, April, 1900.

SIR,

Following a plan which has succeeded admirably in securing a pure milk supply in many American Cities, the Medico-Chirurgical Society of Montreal has established a Milk Commission, affording to those milkmen who are wishful to fulfil the modern requirements of sanitation in connection with their dairies and milk delivery, an opportunity to keep the members of the medical profession and the public generally informed as to the quality of milk supplied and the results obtained by the employment of due care, as laid down by the rules of this Society.

To this end, it has been decided to establish a system of registration, the Society placing upon its register all those milk dealers complying with its regulations, and who are willing to pay their share of the cost of such supervision as the Society may deem necessary. Those upon the register of the Society shall be permitted to freely announce the fact that they are so registered, as long as they continue to conform to the rules and regulations of the Society, of which a general outline is given on the reverse side of this sheet.

The fee for registration will of necessity vary, according to the extent of the business and the extent of supervision found necessary, there being no desire on the part of the Society to make a profit out of the supervision, its object being simply to ensure a thorough supervision and to remunerate the necessary active officials.

The supervision will include chemical and bacteriological examination and veterinary inspection, for which a definite scale of fees will be established. For details, please address, J. ALLAN WILLIAMS, M.D., Secretary to the Commission, 385 St. Antoine Street, City.

I am, Sir,

Yours faithfully,

J. G. ADAMI, M.A., M.D.,

President, Montreal Medico-Chirurgical Society.
