Higher grading of the new receipts of corn, altho gratifying, left much to be desired. Nearly half of the supply coming in still contained more than 23 per cent. of moisture. Unsettled weather and a falling off in the rapidity of the crop movement counted more or less in favor of the bulls, but were considerably offset by reports that the number of cars available at Illinois stations showed a material increase. Estimates were current that the total stock of corn on farms was 1,454,000,000 bushels, an aggregate surpassing any previous record. Scanting of offerings, except, on decided apparns, gave strength to oats, and so, too, did export business by way of the Gulf. Estimates of record-breaking farm reserves—634,000,000 bushels—failed to keep prices down.

Provisions averaged higher as a result of higher quotations on hogs. Most of the buying was for shorts. Winter packing was figured as 2,568,000 short, compared with last year.
