MONDAY MORNING

This Big February Stocktaking Sale is the Sensation of the Hour

F you had fifty thousand dollars inc vested in fur and had a big staff o experts on your pay roll which had assisted in making DINEEN'S FURS popular, what would you do?

Do you not think it would be reasonable for you to keep that staff busy even if you should be forced to sell those manufactured fur garments at less than cost?

That is the argument for the February Stocktaking Sale. We need the money to keep the "pot a-boiling." We want

to keep our staff right "under our wing."

the unemployed appeared and demandd the removal of a local citizen who was vorking with the shoveling gang.

They appealed to Councillor Howell, as hairman of the Citizens' Benevolent Association, but he was powerless to take my action, so he referred them to Councillor Whetter, chairman of the works sommittee. Mr. Whetter, when he learned the circumstances, had the man inquestion discharged at noon, and promised work to the complainants on Monlay morning. One of the men stated afterwards that he had absolutely no money, and was at a loss to know how he was going to exist till Monday.

Was Right on Job.

The street foreman states that he hired the offending citizen on Saturday because he was on the spot shortly after 6 o'clock in the morning, and scarcely enough men could be got at that time either to run the snow plows or commence shoveling, just at the time they are wanted. On the other hand, it is explained that the unemployed men, not having cause to rise early, are not aware when a snowstorm takes place during the night, as was the

Have You a Lame Back?

If the lameness is due to Lumbago or Rheumatism in the muscles the following treatment is almost certain to relieve at once. Rub the back and sides thoroughly with "Nerviline"—the more rubbing the better. The pain destroying properties of Nerviline will sink through all the cords and muscles that are affected—the tension and stiffness will ease off—lameness will depart after the first or second application. It is then advisable to put on a Nerviline Porous Plaster hich will continue to supply warmth and protection to the tender spot.
