STOMACH MEDICINES ARE DANGEROUS

DOCTORS NOW ADVISE MAGNESIA

Just how dangerous it is to indiscriminately dose the stomach with drugs and medicines is often not realized until too late. It seems so simple to swallow a dose of some special mixture or take tablets of soda, pepsin, bismuth, etc., after meals, and the folly of this drugging is not apparent until, perhaps, years af- the third offence, this would not stop terward, when it is found that gastric ulcers have almost eaten their way thru

ulcors have almost eaten their way thru ulcors have almost eaten their way thru the stomach walls. Regrets are then unavailing; it is in the early stages when indigestion, dyspepsia, heartburn, flatu-lence, etc., indicates excessive acidity of the stomach and fermentation of food contents that precaution should be taken. Drugs and medicines are unsuitable and often dangerous—they have little or no influence upon the harmful acid, and that is why doctors are discarding them and advising sufferers from indigestion and stomach trouble to get rid of the dangerous acid and keep the food contents bland and sweet by taking a little pure bisurated megnesia instead. Bisurated Magnesia is an absolutely pure anti-acid which can be ready obtained from any drug store. It is absolutely harmless, is practically tasteless and a teaspoonful taken in a little warm or cold water after meals will usually be found quite sufficient to instantly neutralize exces-sive acidity of the stomach and prevent all possibility of the food fermenting.
