Fact and Fun.
The suggestion of a marine drive and promenade which will connect Dover with St. Margaret's Bay, Eng., has just been commenced. The road is being cut out of the face of the cliffs to the east of Dover. It will be 60 feet wide, gently sloping up the face of the cliffs for a distance of nearly a mile and a half. The cliff-cutting will require the removal of over 1,500,000 tons of chalk.

The Way of the Dandelion.
A One-Minute-Sermon-Nature provided that there should be a winter, in order that the beauties of spring and summer might be more appreciated and better liked thru the contrast of extremes. If one had roses and pinks all the time, they would be as common as dandelions, an dthere are not many things that are so common as dandelions. They run around with the crowd, and are creatures of the throng, moving everywhere in the mass, and doing what others suggest. There are some people who cannot resist the temptations of the crowd, and they think they must be in the smart set and must do as all the others do. That is why one sees so many tired people who do not get satisfaction, because they are following the crowd, and are not the dandelions. The dandelion is really a very pretty flower. Some men and women are like dandelions, in that they become common. They run around with the crowd, and are creatures of the throng, moving everywhere in the mass, and doing what others suggest. There are some people who cannot resist the temptations of the crowd, and they think they must be in the smart set and must do as all the others do.
