SELLING CANADIAN GOODS IN THE OLD COUNTRY

(Times' Special Correspondence) London, Sept. 30—The exhibition at Bristol next year will likely prove a surprise as to the number of Canadian manufacturing firms doing business in Great Britain. A fair number have already taken space and others are negotimanufacturing firms doing business in Great Britain. A fair number have already taken space and others are negotiating. In conversation with an Ontario manufacturer of men's wear today, your correspondent was informed that the opening up of business in Great Britain, undertaken with hesitation, had more than justified itself and that the results had been very satisfactory.

"There are certain goods manufactured in England," he said, "which would not sell in Canada because they are crudely made. That was what we noticed when we started. We felt that the superior make of the Canadian article would appeal to the buyer of taste in spite of the relative increase in cost. There seems no reason why the example of the American manufacturer should not be followed by those in the dominion. If the United States can sell collars in competition with Belfast, and boots in competition with Northampton there is no logical reason why Canadian manufacturers cannot meet with equal success."
