Wall Street Letter by Wire: New York, Jan. 28.—Further bullish operations are likely today in the stock market. With the supreme court taking three weeks vacation Monday, thereby precluding for that time any trust decisions with a good bank statement today, further weakening in money, following the reduction of the English bank rate and the big over subscription to city bonds, expanding institutional investment, with an overall market and a light supply of stocks, it seems to us that the way is clear for a conservative and general advance, and under the circumstances cited we have it would be folly for manipulative elements to neglect so attractive an opportunity to encourage a bull movement, and to encourage a good, reasonable response. We would buy good stocks, using the stop order as a limit. The most important general factor in the week's developments is Canadian reciprocity. The agreement would reduce the cost of living, increase the volume of trade, benefit manufacturers and throw a definite light on the prospect of tariff revision. Congress will be divided, but we believe this agreement will pass. Market literature and comment are more bullish.

The practices for the concert are nearly over, and it will take place early in February.

COAL FROM UNDER THE OCEAN. Hoisted by a Rope Over a Mile Long. Few people have any idea of the depth and magnitude of a good size coal mine. For instance, few people who are using Broad Cove coal today, realize that the coal is taken from a place fourteen hundred feet below the sea level and about a half a mile out to sea, from whence it is hoisted in miniature trains of ten cars (each car of one ton capacity) at about the rate of twenty miles an hour, by steel wire rope which is over a mile long. While the men are digging the coal, the surface of the ground, once level, might be floating directly over their heads.

There are two statistics of the coal from the mine which make it the most profitable coal for household use in Eastern Canada. The first is that it does not burn over or coke when burning, and second, and probably the most important characteristic, it is free from sulphur. It is used in the kitchen range or small heating stove, without the fear of any sulphur fumes, common with all other soft coals. When used in a fire, it does not give off any sulphur fumes, and a very hot fire, if it is used in a furnace, will not be much economy for the user.

PROPER USE. It is just as clean for cooking purposes and much cheaper than the so-called hard coals. It is ideal for open fires. As somebody has said, "ever and a pound of Broad Cove coal, if it is used in a household, will save you a great deal of money." If your dealer does not handle it, Mr. F. W. Blizard, of this city, or in his section of New Brunswick, is the man to see.

DEMOCRATS OF MAINE ARE EAGER. (Continued from page 1) and representatives are shifting their views hourly as dispatches from their constituencies come rolling in upon them. The Democrats are the only men in congress who know just what they stand on the proposed agreement. With few exceptions they seem to be enthusiastically in favor of it.

ST. JOHN'S 27th, Jan. 28.—(Canadian Press)—Newfoundland newspapers, including the government organ, express satisfaction over the outlook for reciprocity between Canada and the United States. In semi-official circles the proposal is believed to be settled early in consideration of the fact that the reciprocity bill is in such compact between Newfoundland and the United States.

PARLIAMENTARY PICTURE. In Messrs. Holman's window, King street, may be seen the picture which the Art Union of London present this year to all subscribers, and which will be a valuable and historic souvenir of the occasion. The subject is the proclamation of King George on May 9, 1801, in the foreground, bringing a royal salute, at the moment when the proclamation is read, and the flag hoisted from the mainmast. The picture is by the celebrated W. L. Wyllie, who has made a true and stirring picture. St. Stephen's house. The Traylor will bring a box of molasses to either St. Stephen or St. John on her return trip.

MRS. NORMANSELL THINKS NOT. Mrs. Normansell was asked today by a Times reporter and she did not think that she was suspected by the police as being the woman who had been seen in the street with a man who had not seen him since he was arrested. She said she loved the man too well to believe he would be guilty of assaulting her. He was in the habit of coming into her store very often.

THE WELCOME SNOW. A heavy snowfall, with very little wind, has prevailed in St. John all day, and has provided the first really good sleighing of the winter. The hope is universally expressed that the weather will not change to rain. The need of snow has been keenly felt throughout the southern part of the province.

MARKET SUPPLY LIGHT. Since Christmas there has been hardly a Saturday in the country market with what might be termed a plentiful supply of country produce, but if the present fall of snow remains, this condition of things is expected to change. The scanty supply has been due in a large measure, to the lack of snow and to the unsafe condition of the ice in some places, and it is not because there is a scarcity of produce. This morning was no exception to the general rule, and prices were still high because of the lack of supply.

OUR COURTS TOO EASY ON CRIMINALS? (Continued from page 1) bing his fellow citizens by breaking and entering their premises. Twice he had been allowed his freedom on suspended sentence, and a third time, on an old charge, had been sentenced to five years in Dorchester. This was in 1909, and he had served but a short time, before he was given another chance, and is now a ticket-of-leave man, and was allowed out again last week after his name had again greeted the police sheet.

These are just a few instances where men who have been known to the police as worthless or dangerous characters have been given their liberty on a clause in the law, which some citizens claim is being "overworked," and though there were many instances where prisoners were sentenced to terms long or short, those who were given the advantage of the clause in question were in the majority.

AN EPIDEMIC IN HOCKEY. In the city at present there seems to be hockey epidemic raging among employees of business houses. The fever has spread amongst the different houses of the business district, and hardly a day goes by without a new septette making its debut for honors with the puck and stick. The latest acquisition is another team from the C. P. R. freight office. They are out with a challenge for their friends in the I. C. R. local freight department, and will battle on Saturday evening next in the Queen's rink. The C. P. R. team will be Messrs. H. L. Lindsay, J. E. Burke, H. W. Newhall, J. W. Walker, A. D. McLeod, H. L. McKean, and C. V. Johnson.
