AARON KELLY DIED
AT VICTORIA, B. C.

Former Sunbury Man who
Achieved Success in Mining
Ventures, Passed Away
After Active Career.

Fredericton, Junction, Feb. 18.—On Thursday a message was received here announcing the death of Aaron Kelly at Victoria, B. C. Mr. Kelly was one of the prosperous business men of this place 30 years ago. He conducted a general store and bought ship knees and lumber at a time when money was made rapidly out of this class of commodities. Later he followed the lure of the West and in a few years is reported to have made and lost half a dozen fortunes in mining ventures. No matter what financial misfortune overtook him he was always able to come back and get on "easy street" again.

At the time of his demise, he was 65 years of age, and was never married. He is survived by two sisters, Mrs. Hannah M. Kelly, of Whitewater, Wis., and Mrs. Charles Tracey of Tracy Station. He was a son of the late David Kelly, his mother being Miss Rebecca Hart, and he leaves a large connection in Gladstone and Sunbury.

The late Thomas H. Kelly and Penell Kelly, B. A., were brothers. Since going West, deceased had made frequent visits to his native home and all found him a most pleasant companion, being able to talk of his varied experiences in a most engaging manner.

After years of prospecting and wandering, he settled in Nelson, B. C., and had made his home there for some years.

The news of his death was received here with a shock of regret.

FREE
ADVICE
TO WOMEN

Women suffering from any form of illness are invited to promptly communicate with Mrs. Pinkham at Lynn, Mass. All letters are received, opened, read and answered by women. A woman can freely talk of her private illness to a woman; thus has been established this confidence between Mrs. Pinkham and the women of America which has never been broken. Never has she published a testimonial or used a letter without the written consent of the writer, and never has the Company allowed these confidential letters to get out of their possession, as the hundreds of thousands of them in their files will attest.

Out of the vast volume of experience which Mrs. Pinkham has to draw from, it is more than possible that she has gained the very knowledge needed in your case. She asks nothing in return except your good will, and her advice has helped thousands. Surely any woman, rich or poor, should be glad to take advantage of this generous offer of assistance. Address Mrs. Pinkham, care of Lydia E. Pinkham Medicine Co., Lynn, Mass.

Every woman ought to have Lydia E. Pinkham's 80-page Text Book. It is not a book for general distribution, as it is too expensive. It is free and only obtainable by mail. Write for it today.

I.C.R. SURPLUS
ACCOUNTED FOR

Yards at Moncton Heaped with
Rolling Stock in Need of
Repairs—Heavy Storm Would
Cripple Road.

Moncton, N. B., Feb. 20.—The statement has been made in the press that the Intercolonial Railway is short of locomotives. This is not quite correct. The Intercolonial may be short of motive power but it has locomotives to burn—such as they are. The trouble is that the locomotives are not kept in repair. The immense yards here look like a great heap of scrap, pile full as they are of more or less dilapidated rolling stock.

A short time ago some forty locomotives were standing on the sidings, exposed to the weather, and had been there for weeks and months.

Their numbers were 115, 78, 162, 18, 121, 108, 63, 106, 200, 65, 60, 122, 179, 182, 187, 184, 123, 114, 135, 55, 278, 188, 211, 288, 294, 228, without number four. Also tenders 117, 106, 33, 30, 82, 62, 142, 113, 129, 36, 58, 84, 176 and one without number. If these locomotives and tenders are beyond repair they should be sent to the scrap heap. The working force in the shops has been reduced and all the time large purchases of new locomotives and cars have been made on capital account. It is by doing this and keeping down the expense of repairs that the surplus is largely accounted for.

The railway has been very fortunate the past two winters in the matter of snowfall. It has been especially so this winter, as this side of the Quebec boundary there has not been a single storm of sufficient magnitude to interrupt traffic and snow ploughs have only been required two or three times. A railway man in conversation with The Standard expressed the opinion that with the average winter storms the condition of the rolling stock is such that traffic would never have been seriously interfered with.

As it is great difficulty is frequently experienced in making time on the road, because of the failure of locomotives to steam properly.

I have taken it on many occasions, with excellent effect, and no after-effect. You are quite at liberty to make use of this letter, as I think it a duty to express my opinion on the subject. Yours truly,
