J. L. STEWART, EDITOR. WEDNESDAY EVENING, JULY 16, 1873

Murdering Lovers. The murders for love—not for love of murder or of money, but love of the victim—that have occurred recently are numerous enough to attract the attention of philosophers to the sanguinary side of "the tender passion."

Half or more than half of the murders that have been committed within the last few months have had the love of woman for their exciting cause or excuse.

Smith was hanged the other day in Massachusetts, blessing the woman who jilted him in favor of the man he shot down by her side.

In another column is an account of a tragedy in which two eloping lovers were the actors. Jilted lovers, discarded mistresses, and divorced and jealous husbands are the most numerous of modern murderers, as our columns have shown.

We need not recount the long list of tragedies that illustrates this. The Goodrich horror is one of the most striking illustrations, and shows how love and hate, the tenderness of a fond woman and the ferocity of a modern murderer, alternate in the gentle breasts of the angels of the hearth.

Kate Stoddard seems to be merely a representation woman. She was betrayed under pretense of marriage. Discovering her lover's perfidy she fell to him.

When separation was decreed, when she was cast aside that he might be lawfully wedded to another, she murdered him "because she loved him too well to lose him."

Then she placed a lock of his blood-stained hair in a pocket she wore, washed his face and kissed him tenderly, watched his bloody corpse for a day and night, and then took away various articles of his, not, it would appear, for their intrinsic value, as she did not spend a cent of his money even when in need, but as mementoes of the dead. She killed him because she loved him so.

The latest Canadian illustration we have is a tragedy that occurred last week in Lindsay, Ontario, the story of which is thus told:

The deceased Sarah Alice Hayward and a man named David Nesbit had been keeping company until lately, when her friends heard he was a married man, and warned her against encouraging him.

He persisted in his attentions, saying he was married to the deceased, and that if he could not get her a life would be lost. This threat was made last week. This morning he met her on the way to the station, and wanted her to walk with him. She refused and returned to the house of her brother, H. Hayward, book-keeper for Messrs Medler & Sadler.

He followed, and after some angry words, he said: "You had better go and find care of your poor wife and child," he drew a revolver and shot her in the back of the head. She screamed and ran towards the door, when Nesbit shot again, and she fell through the doorway. The servant, hearing the shots, came in to see what was the matter, and found her lying on the floor with her arms around her crying. She ran out to give the alarm and brought three or four men to the door, but Nesbit had disappeared. The chief constable was apprised of the matter and was soon on the alert. This morning he entered the Lindsay Hotel, and found that the prisoner was in bed up in the third story. He quickly ascended the stairs, and found the prisoner in a room, and found that the prisoner was in bed up in the third story. He quickly ascended the stairs, and found the prisoner in a room, and found that the prisoner was in bed up in the third story.

He found him "with his arms around her, crying." Like Goodrich's murderer he had been the victim of a woman's love. He murdered for love. Some will argue that love has nothing to do with these outbreaks of fiendish passion, but they are mistaken. There is no doubt about it being the genuine article that keeps the matrimonial market active one phase of it. Young men and maidens who are indulging in "love's young dream" don't know how soon they may be actors in one of the tragedies that result when only one of a pair of dreamers awakes.

Our journalistic brethren, we hope, will see the best side of our dingy town, and be pleased with their visit. It is to be regretted that the press of Maine is so thinly represented. We feel sure that their visit will dispel many wrong impressions they have had regarding the Blue Nose, and that, hereafter, they will think longingly and lovingly of St. John whenever the thermometer is among the nineties.

Many of the Government papers, including the one published in the Premier's constituency, have severely denounced Sir Hugh Allan's conduct, as revealed by himself in his private letters. He has yet to find a defender of his corrupt practices.

The Governor General and party were at Dalhousie, yesterday. Unfortunately for them there had been sufficient notice given of their arrival to permit the getting up of an address, to which they listened at the Court House, after a drive around the town they embarked on the steamer Druid for Miramichi.

Honesty is the best policy in medicine as well as in other things. Ayer's Sarsaparilla is a genuine preparation of that unquenchable spring medicine and blood purifier, decidedly superior to the poor imitations heretofore in the market. Trial proves it.

J. ALLINGHAM, 15 Charlotte street.

Nova Scotia News.

The agents of the Inman Line presented \$500 to Mr. Harding, one of the inhabitants of Port LeBlair, who so kindly and hospitably opened his house to the shipwrecked passengers and exerted himself along with his family in attending to their wants, and rendering their condition as comfortable as they did.

The Ministers of Marine and Fisheries and of Customs have permitted the agents of the Boston steamers to carry freight in their steamers to and from Port Hawkesbury and Charlotte-town, P. E. I. As these steamers are American bottoms they have hitherto been forbidden to carry freight between British ports, but since the Island has joined the Dominion this restriction has been removed.

A few days ago an officer of H. M. Service, while visiting some lady friends in Halifax, was much prepossessed by the appearance of a pretty waiting maid, who entered the room.

"Grace was in her step, heaven in her eyes. In every respect she was lovely."

He became enamoured of the young woman, sought an interview, found that though poor she was lady-like, and of respectable family, proposed, was accepted, married her, and last week started on a wedding tour. Who will ever henceforth doubt the potency of love at first sight—Recorder.

Large quantities of fish have been detained in bond at many American ports. They are now being shipped to Halifax in bond, cleared again, and taken back, thus evading the duties. The steamer Commerce arrived Monday in Halifax from Boston with a cargo of salt fish, which were entered, but not a barrel started back with the same cargo that she brought. Some other similar cargoes are expected to be on their way to undergo the same process.

For advertisements of WANTED, LOST, FOUND, FOR SALE, REVENUE, or TO LET, see Auction column.

Advertisements must send in their favors before 12 o'clock, noon, in order to insure their appearance in this list.

AUCTIONS. Desks, Furniture, &c—Lockhart & Chipman Clothing, &c—E. H. Lester

Hotel Directory. Victoria Hotel, Germain street. United States Hotel, north side of King Street. Victoria Hotel, Prince Wm. street. Victoria Dining Rooms, Germain street, (opposite Market).

On First Page: To Tobique Forks and Back.

On Fourth Page: Elopement, Murder and Suicide.

Personal. Oliver David Byron and lady arrived at the Victoria Hotel by train this morning.

Dr. Prace, one of the editors of the New York Observer, arrived at the Victoria last evening.

Mr. Page, of the Public Works Department, arrived at the Victoria Hotel last evening. This morning he took the train for the business connected with the Bay Verte Canal.

Hon. P. Mitchell is at the Victoria Hotel.

The Baptist Mission Union picnic today on the grounds of Mr. Sheldon, South Bay. The train left Carleton at 1.30 p. m.

Gurney Division's strawberry festival was well attended last evening, and a large sum of money was realized.

There was an alarm of fire this morning from Box 45, but little or no damage was done.

The Congregational Church Sunday School have their annual picnic to-morrow at Robesay. Trains leave at 10 a. m. for the picnic grounds.

The pupils of St. Peter's school, Portland, gave an entertainment last evening in St. Peter's Hall. At the close a number of prizes were presented to different pupils.

There are at present a great number of strangers in the city. The City of Portland yesterday was crowded. The train had, besides the Press visitors, a great many passengers, and this morning's train from the west brought another detachment. The Victoria Hotel people were obliged to turn a number of people away, the house being completely filled.

Two or three vile young fellows, loafing at the entrance to the Waverley House, yesterday, amused themselves by squirting tobacco juice on the dresses of passing ladies. They should be made an example of.

Teachers' Institute. The afternoon session, yesterday, of the Institute was as interesting as the former meeting. This morning at 10 o'clock the Institute again commenced its session, and there will be a session in the afternoon and another in the evening.

Lee's Opera House. The audience was again small last evening, but the performance was in every respect first class. The other attractions at present in the city present as large an audience as should gather to witness a chance, amusing and entertaining performance.

Dramatic Lyceum. "The Winning Hand" drew another good house last evening, and it was put on as well as on the previous evening. There were quite a number of the press visitors present, by invitation of Mr. Lanagan. To-night Mr. Ward appears as Shauin, in "Aarrah-na-Pogue," a character which, no doubt, he will play well, and Miss Montague as Fanny Powers.

ONE OF THE MOST DELICIOUS DRINKS at this season of the year is a glass of cool sparkling Soda Water from F. B. Martor's elegant Soda Fountain, 21 King street, if June 7

Confecionary Manufactory.

A reporter of THE TRIBUNE called at the confecionary manufactory of J. R. Woodburn & Co., lately opened in Waterloo street, and watched with interest the various processes by which the sugar is turned into candies of all kinds.

The building is situated near the corner of Peters and Waterloo streets, and was formerly used by L. H. Kidd as a carriage factory. There is plenty of room in it for a very extended business to be done. Entering the front-door the visitor is ushered into the wholesale warehouse. Here the manufactured goods are stored in boxes and bunks built round the sides. This is also the sales-room, and, on one side, is the office of the firm. At the rear of this part is a wing that has been added to the main building by Woodburn & Co., and in which they have placed a steam engine. The engine is one of ten horse power, and was built and fitted up by Messrs. Fleming & Sons of this city. This engine drives all the machinery and from it steam is carried to all parts of the building, for heating, melting and drying purposes. The engine room is also used to work the elevator, which is just off from the engine room, and goes to the top of the building, which is imported direct by the firm. Another large room on this floor is used as the principal work room. Here the sugar is boiled and moulded into all sorts of candy, all the processes of which are very interesting. It may have been often noticed that some of these little round sweets are rough. This is done by allowing the syrup to be poured upon them in a very small stream while the cylinder revolves. It may have been also noticed that some of these little round sweets are rough. This is done by allowing the syrup to be poured upon them in a very small stream while the cylinder revolves.

It is placed on wooden trays with canvas bottoms and then on racks round the wall. The room is heated with steam coming direct from the boiler below.
