

ILLUSTRATIONS

	PAGE
Frontispiece..... Observatory from South.....	
Fig. 1..... Parts of Telescope on Observing Floor.....	29
Fig. 2..... Polar Axis ready for hoisting.....	30
Fig. 3..... Raising the Mirror.....	32
Fig. 4..... Mirror resting on Cell on Silvering Car.....	34
Fig. 5..... Mirror and Cell ready to attach to Tube.....	35
Fig. 6..... Images from Zone Plates.....	39
Fig. 7..... Principle of Hartmann Method.....	41
Fig. 8..... Graphical Representation of Zonal Aberrations.....	49
Fig. 9..... Telescope from South—Tube West of Axis.....	54
Fig. 10..... Telescope from South—Tube above Axis.....	56
Fig. 11..... Telescope from North-West—Tube East of Axis.....	58
Fig. 12..... Photograph of Upper End of Tube—Plate Holder and Newtonian attached.....	60
Fig. 13..... Method of Changing Mirrors.....	63
Fig. 14..... Ball Bearing for Polar Axis.....	71
Fig. 15..... Main Switch Board—North of North Pier.....	74
Fig. 16..... Double Slide Plate-Holder.....	78
Fig. 17..... Slit diaphragm and comparison prisms, twice natural size.....	80
Fig. 18..... Spectrograph with Temperature Case Detached.....	89
Fig. 19..... Spectrograph with Temperature Case Attached.....	93
Fig. 20..... Dome from North.....	97
Fig. 21..... Framework of Dome from North.....	99
Fig. 22..... Telescope and Platform in position for Direct Photography.....	102
