

the aid of an ignorant "Private-Cure Doctor." In a few weeks after this wretched treatment, that horrid disease, Syphilis, broke out, and sores appeared in my throat; for this I took Mercury, Potassium, Sarsaparilla, with gargles. For a time I thought myself cured; but my gums became sore, my teeth loose, pains in my bones, etc., and in a few months hard lumps would appear in my throat, around my neck, and other parts of my body. Sometimes these would gather and break, leaving discharging sores and ulcers; those things began to spread, and then my nose, roof of my mouth, eyes, tongue, would be attacked. For over three years I suffered all the torments of the wretched. I went to Paris, placed myself under the best doctors there (Ricord, Du Barry, and others); took vapor-baths of Mercury, Sulphur, Iod. Potassium, Arsenic, and other popular treatments. For a while I thought myself cured; but in a few months old sores and ulcers would break out again, and new parts of my body would be covered with them. I visited the celebrated Springs of Bath, Cheltenham, also the German Springs, Baden-Baden, and returned to this country still uncured.

I met a gentleman in Paris who lives in Montreal, Canada. He told me that you cured a friend of his. I called at your office in the early part of 1863, and commenced using your Renovating Resolvent and Pills, and bathed my limbs, that were drawn out of shape by Rheumatism, with your Ready Relief. *The first application of Ready Relief* stopped the pain and enabled me to sleep well. In the course of a month my appetite improved, and my blood became purer and better. This gave me hope. I called on you: you stated that you had discovered a new process for obtaining extracts from Sarsaparilla (in vacuo), and recommended it to me. I took it, and oh, what a change! I continued to use Sarsaparillian Resolvent; with every bottle some new indication of improvement would follow, and twelve bottles, with the Pills and Relief, cured me. Not a sore or ulcer has appeared since. I have now two children—one over two years, and the other six months. They are healthy, have never been sick, and not the least vestige of the taint of disease has shown itself. So I am well convinced that the virus of the old uncured syphilitic disease was completely eradicated from my system, as well as the mercury from my bones, for I never feel the least pain, even when getting wet. I keep my system healthy and regular by taking two Radway's Pills twice or three times per week, and in the Spring and Fall take a bottle or two of the Sarsaparillian Resolvent. This is all the tax I am called on for doctor's bills. Your friend forever, R—N R—CH.

## Pulmonary Diseases Cured by Radway's Sarsaparillian Resolvent.

### Coughs, Bronchitis, Consumption, Diphtheria.

Few persons but are troubled, more or less, with difficulty of raising Phlegm, a thick humor or matter deposited from the blood, that obstructs the air-passages and glands of the Bronchi, etc. The accumulation of this matter leads to Ulceration, Tubercles, and Consumption, and the patient suffers great distress until it is removed. One teaspoonful of the Resolvent will loosen the Phlegm and enable the patient to expectorate with ease. Every person troubled with Cough, Bronchitis, Catarrh, Tightness of the Chest, Phlegm, Inflammation of the Lungs, Congestion, etc., should take a teaspoonful of the Sarsaparillian at once, and bathe the chest with Radway's Ready Relief. If the Cough is constant, take the Resolvent regularly—three or four times a day—or whenever a fit of spasmodic cough seizes you.

It secures a good appetite, makes sound and healthy flesh and fibre, gives strength to the weak and repairs the waste with healthy material. Let not the Consumptive neglect this warning, nor reject the hope held out. Exclusive direct remedies, that act only on the lungs, will never cure; they may smooth and soften the path to the grave, but never will they restore the patient to health.

See pages 60 and 61, False and True.

Convulsions arising from a wound is dangerous.

Women whose blood is not evacuated by their menstrual flux, often vomit it up.

Excessive sleep or wakefulness is alike injurious.
